Anvisa on Monday banned (<http://pesquisa.in.gov.br/imprensa/jsp/visualiza/index.jsp?jornal=1&pagina=45&data=17/07/2017>) all lots of the Supplement of the Brand Cactinea, Vitamin C based Acerola with Extract of Cactaceae Hyloceres Undats, Nutreo Commerce Homeopathic Products Eireli. The product has no safety assessment for use in food and also does not have registration as a new drug, which is required by the Agency.

Any advertisements in the electronic media were also banned. The manufacturing company must collect all the stock available in the market.

Magnesium Sulfate

The Agency also determined the ban (<http://pesquisa.in.gov.br/imprensa/jsp/visualiza/index.jsp?jornal=1&pagina=45&data=17/07/2017>) on the specific product Magnesium Sulphate 100 mg / ml solution for injection, 10 ml ampoule, MFA batch of 08/2018, manufactured by Samtec Biotecnologia Ltda. The Agency received a Report of Fiscal Analysis from the Central Laboratory of Public Health of Paraná (Lacen / PR), which presented unsatisfactory results in the aspect tests for the product in question.

The aspect assay evaluates the medicine and the packaging to see if the visual characteristics and the appearance of the product conform to the quality standard.

Specific medicinal products are prophylactic, curative or palliative pharmaceutical products which do not fall under the categories of new, generic, similar, biological, herbal or notified medicinal product and whose active substance (s), regardless of nature or origin, do not Is eligible for a bioequivalence test with respect to a comparator product.

Learn more about different types of medications (<http://portal.anvisa.gov.br/conceitos-e-definicoes7>) .
