IRREGULAR MEDICATION

Suspended three lots of topical antiseptic Riohex

Three lots of the Riohex drug were suspended due to discoloration of the product

The change in color of samples from three lots led to the suspension of the trade in the drug Riohex (Chlorhexidine Digluconate). Lots R1505789 and R1505714 of Rihex 2% 100mL and lot R1601068 of Riohex 4% 100mL, both manufactured by Industria Farmacêutica Rioquímica Ltda, were suspended by the Agency.

The manufacturer of topical antiseptics is responsible for collecting the stock of the lots in question.

Fake antibiotic

United Medical Ltda, manufacturer and owner of the Ambisome 50mg drug, has identified counterfeit batches of the antifungal antibiotic on the market. Ambulance Batch Units 006404 (Amphotericin B - Liposomal) 50 mg presented different characteristics from the original.

According to the company, Ambisome units exhibited divergent aspects of the constants in the original packaging regarding the shelf life, whose manufacture is dated 01/01/2010 and valid on 02/28/2019.

Anvisa ordered the seizure and destruction, throughout the national territory, of the units of lot 006404 of the antibiotic Ambisome.

These health measures (<http://pesquisa.in.gov.br/imprensa/jsp/visualiza/index.jsp?jornal=1&pagina=36&data=19/01/2017>) were published in the Official Gazette on Thursday (19/01).
