Anvisa suspended the distribution, sale and use of 13 lots of the drug Gynera (gestodene + ethinyl estradiol). The lots of contraceptives manufactured by Bayer SA presented results that do not comply with current sanitary legislation. Measure was published in the Official Gazette (DOU) this Monday (26/6).

According to the statement of voluntary withdrawal of Bayer SA, the batches of the medicines in question presented unsatisfactory results regarding the stability study.

In addition to the suspension of Gynera's lots (http://pesquisa.in.gov.br/imprensa/jsp/visualizar/index.jsp?data=26/06/2017&jornal=1&pagina=39&totalArquivos=224), resolution RE 1,698 of June 23, 2017 requires the company to promote the collection of the existing stock in the market.

Check out the suspended lots below:

Medication	Lot	Shelf life
------------	-----	------------

Gynera (gestodene + ethinylestradiol) with 21 days	BS01EN6	12/4/2017
