Company Announcement Date:

December 26, 2017

FDA Publish Date:

April 14, 2020

Product Type:

Drugs
Generic Drugs

Reason for Announcement:

Lack of Sterility

Company Name:

PharMEDium Services, LLC

Brand Name:

PharMEDium Services, LLC

Product Description:

Compounded injectables

Company Announcement

PharMEDium Services, LLC (PharMEDium) is voluntarily recalling the below lots of drug products to the hospital/user level due to a lack of assurance of sterility. Administration of a drug product intended to be sterile that is not sterile could result in serious infections that may

be life-threatening. To date, PharMEDium has not received any reports of complaints related to the products but is issuing this recall out of an abundance of caution following a commitment made during a recent inspection of the company's facility.

The recall is being issued because PharMEDium conducted a retrospective review of all commercially distributed product lots compounded in the Memphis location currently within their labeled expiration date in response to an FDA request regarding microbial control program during recent inspection to provide verification of acceptable microbiological testing results of the ISO5 environment, personnel glove sampling results, media fill results, sterility testing results, and endotoxin results. The review indicated that a total of 55 lots of different products impacting 25,327 units had two unsuccessful media fills. The remaining lots were associated with environmental monitoring or personnel monitoring excursions in the ISO 5 space on hood/surface and glove tip. Finished product release testing for both sterility and endotoxin were acceptable. Although there were no defects identified in these products, as a conservative measure, a recall is being initiated. .

The products can be identified by referring to the sample labels provided. These products were distributed nationwide in the USA to hospitals/clinics.

PharMEDium Services is notifying customers of the voluntary recall by phone. Customers that have any of the affected medications that are being recalled should immediately quarantine the product, discontinue use and destroy per their hospital protocol. Customers with any of the affected medications can also reference PharMEDium Services website for more information on the specific lot numbers affected and contact information: www.pharmedium.com.

Patients and healthcare providers with questions regarding this recall can contact PharMEDium Services Clinical Pharmacist at (847) 457-2220, Monday through Friday, between 8am and 5pm Central Standard Time or via e-mail at dantonio@pharmedium.com (<mailto:shasan@pharmedium.com>).

Patients should contact their physician or healthcare provider if they have experienced any problems that may be related to the use of these products.

Adverse reactions or quality problems experienced with the use of this product may be reported to the FDA's MedWatch Adverse Event Reporting program either online, by regular mail or by fax.

- Complete and submit the report Online (</safety/medwatch-fda-safety-information-and-adverse-event-reporting-program/reporting-serious-problems-fda>)
- Regular Mail or Fax: Download form (</safety/medical-product-safety-information/medwatch-forms-fda-safety-reporting>) or call 1- 800-332-1088 to request a

reporting form, then complete and return to the address on the pre-addressed form, or submit by fax to 1-800-FDA-0178

This recall is being conducted with the knowledge of the U.S. Food and Drug Administration.
