Dear Health Professionals,

With the arrival of the winter months, there is a serious increase in cases of flu, colds, influenza and covid throughout the country and the world. Moreover, the common opinion from the patients is that the duration of the disease is longer.

Against all these complex situations, Hacettepe University Head of Infectious Diseases Department Prof. Dr. Serhat Unal enlightens us.

In this session, which will take place on the online platform between 10.00-11.00 on 21.12.2022, the things to be considered in the Influenza & COVID Spiral will be discussed.

*To join the session, which will be sponsored by Scientific Phytotherapy pioneer Alchemlife, you can click on the link **and** connect to the live broadcast after entering the information below.*
