## **ALBYPHARMA**

### **Europe's only independent FDA Approved Beta-Lactam plant.**

AlbyPharma Ireland, is a well-established pharmaceutical company with 40 plus years of experience supplying European and US markets.

- First oral FDA-Approved Beta-Lactam facility in Europe.
- In the 1990's, it was the first to launch generics in Ireland/UK.
- Has solid dosage forms, softgels, sachets & dry powder suspension manufacturing capabilities.
- Full in-house R&D capabilities.
- Fully equipped Analytical & Development labs.
- CMO Capabilities.

Act locally. Think globally.

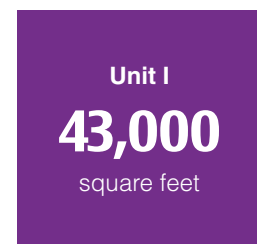

Proudly as an Irish indigenous enterprise, AlbyPharma is located in Clonmel (South-East corner of Ireland), with direct routes to major airports:

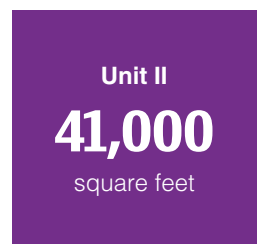

- Shannon Airport (90 Km).
- Cork Airport (100 Km).
- Dublin Airport (170 Km).

The site is on 4.4 Hectares and it includes:

Main Plant:

Antibiotic Plant:

The manufacturing plants have separate production cores, warehouses and laboratories.

## Europe's only independent FDA Approved Beta-Lactam plant

Both plants (Unit I & Unit II) are self-contained facilities, capable of supporting the entire production process completely. Stability and validation testing are conducted on site.

The process technology includes but not limited to: Pelletizing and Coating, Sustained Release Tablets and Hard Gelatin/Soft Gelatin Capsules.
