

PRODUCTS & LICENSING

Basic Pharma operates a fully GMP certified facility at the Brightlands Chemelot Campus in Geleen, the Netherlands. We act as a Contract Manufacturer but also produce our own developed products. Products range from Rx to OTC and Consumer products.

CMO Products

Basic Pharma Manufacturing acts as a contract manufacturer for several parties, mainly producing liquids (solutions and suspensions), semi-solids (creams, ointments and gels), pre-filled syringes and vials.

From formulation and filling to artwork and packaging, you can rely on our expertise and skills to develop and manufacture products that meet your product qualifications at competitive prices.

CMO Services

Basic Pharma can be your preferred contract manufacturer for your pharmaceutical or biotech products, both investigational medicinal products (IMPs) and commercial products.

Main CMO capabilities:

- GMP production & packaging, including serialisation (FMD directive)
- Serialisation only (CMO)
- GDP warehousing
- Processing of high-potency compounds

Registered and non-registered products

Basic Pharma has several self-developed Rx, OTC and consumer products. Please contact us to enquire the availability of a product in a specific region. See our website for an actual product overview and products under development.

Out-licensing

Basic Pharma is the intellectual property owner or co-owner of several product dossiers. We are open to exploring **out-licensing** of our products in multiple territories. Our dossiers are available in e-CTD format. Depending on local legislation and preferences, a **distribution agreement** could be an option.

In-licensing

Since Basic Pharma Manufacturing operates its own GMP facility and is constantly pursuing further expansion of its activities and pipeline, your product dossier may be of interest to us. If you have products available for licensing that are in line with our core competencies (primarily liquids, semi-solids, prefilled syringes and vials), we may be interested in manufacturing them under your license.
