

Established in 1986, Bhavna Laboratories Pvt. Ltd. has set a niche in the Indian Pharmaceutical Industry as a manufacturer of Active Ingredients & Intermediates. Since our inception, we have focused on providing quality pharmaceuticals along with maintaining high manufacturing standards.

Besides being an FDA of India approved company (Drug License No.MH /KD-392), we have also acquired a cGMP certificate (India) for all the drugs manufactured. We are a fast-growing integrated company providing excellent multipurpose facilities. We match WHO GMP standards since our inception for being the sole and reliable manufacturer & exporter of pharmaceutical bulk drugs [API] and intermediates. We manufacture our brands, under neutral labels as required by the buyers as well as contract production. We have equipped modern manufacturing facilities and state-of-the-art technology for achieving quality products.

Our primary focus has been on the Muscle Relaxant & Ophthalmic segment, which is estimated to be one of the fastest-growing therapeutic segments. Currently we manufacture Chlorzoxazone, Tropicamide, Timolol Maleate & Homatropine Hydrobromide and are on anvil of introducing others within this segment. Additionally, we also undertake Toll/Custom Manufacturing for API and Intermediates on a contract basis. The manufacturing facility operates as per cGMP norms and has an installed capacity of over 500 Tonnes per annum.

With a strong team headed by technocrats in the area of R&D, technology, world-class infrastructure, Bhavna Laboratories Pvt. Ltd. has established a large portfolio of molecules in the commercial production along with several more in the pipeline.

## Facility

Our manufacturing facility is located at Talaja MIDC, 36 km from Mumbai in the state of Maharashtra, on the western coast of India. Situated in an approved chemical zone that is well connected, by road and rail, this plant's proximity to the Sea Ports and Airports supports efficient deliveries.

This entire production chain operates with Current Good Manufacturing Practice (cGMP) norms and has all the necessary infrastructure and services of a modern and multipurpose pharmaceutical plant. The versatility of the facility allows a possibility for a wide range of reaction capabilities. Each plant is adequately supported by dedicated power processing sections.

Our Quality Assurance Department ensures product quality and compliance of all regulatory requirements. Well supported by an efficient Quality Control Laboratory following Good Laboratory Practices (GLP) and has all requisite types of equipment. The warehouse, engineering and maintenance departments provide complete support functions.

Safety precautions are taken at every stage of production to ensure smooth handling and processing of chemicals. Environmental concerns are duly addressed, and all effluents & hazardous wastes are transferred to the Common Effluent Treatment Plant (CETP) or the Mumbai Waste Management Limited (MWML) for treatment and disposal. Our dedicated team of professionals ensures the implementation of all systems and procedures on an uninterrupted basis.

## Our Team

We strongly believe that our greatest asset is our manpower, with well qualified & skilled workforce who are dedicated & focused on our vision. We are a fully integrated company, every department works in complete coordination with each other. Our experienced research team has vast experience in the Pharma industry and is dedicated to providing the best value-for-money products, within the committed time for complete customer satisfaction.

## Quality Policy

We believe, quality is a fundamental need and is of paramount importance for the pharmaceutical industry. This has propelled us to implement an effective Quality Management System, which is guided by our Quality Policy.

- Commitment to total customer satisfaction
- Following good manufacturing practices norms at every stage
- Stringent checks to ascertain compliance with statutory & regulatory requirements
- Maintaining an effective quality management system
- Involving and encouraging training of employees & transparency in dealing with suppliers to maintain smooth functioning
- Continual improvement in the effectiveness of our business operation systems

## Meeting Customer Satisfaction

Our products meet every specification given by our customers concerning purity and product delivery, with the help of extensive technical backup support. Our widely equipped manufacturing plant includes; overall production, quality control, and assurance, along with listing facilities. In-time and accurate manufacturing have established us as a substantial producer of world-class bulk drugs.

Bhavna Laboratories Pvt. Ltd. stands strong as an experienced reliable and well-reputed manufacturer of key Pharmaceutical bulk drugs [API] and Intermediates for global markets.

## Our Clientele

Bhavna Laboratories Pvt. Ltd. is well known for our quality and has earned accolades from our clients worldwide. We have made our presence felt in international markets with bulk productions being exported to South East Asia, the Middle East, and several European countries, to name a few.
