

Corporate Profile

RESEARCH FOR BETTER HEALTH

Bio-Labs

ISO 9001 : 2008 CERTIFIED

Corporate History

Upon establishment in 1989, Bio-Labs had envisioned a self-dependant Pakistan producing superior quality medicines and vaccines to promote animal health across the country. Since then our Animal Health Division has been vigorously working towards this goal and today our vision is a reality as we pride ourselves on being one of the leading animal vaccine and pharmaceutical manufacturers in Pakistan.

In 2005, a state of the art manufacturing facility was set-up to manufacture and market pharmaceutical formulations for human therapeutic use. It included solid and liquid oral dosage forms (tablets, capsules, syrups, suspensions and dry powder), topical products (creams, ointments, lotions and oral gels), and injections (sterile liquid vials, sterile liquid ampoules, sterile dry powders and sterile lyophilized powders).

Mission

Our mission is to be a company of high quality standards, committed to medical ethics and consumer satisfaction with environmental and social consciousness while embracing innovation, change and development.

Manufacturing Expertise

Today Bio-Labs is manufacturing over 200 pharmaceutical products including pharma, veterinary & biological products and is living up to the vision of *A Comprehensive Health Care Company*. Operations at Bio-Labs are based on the most modern and meticulous techniques and our manufacturing facility is constructed on the pretext of controlling cross contaminations, ensuring smooth flow of personnel and materials, provisioning optimum environment and assuring worker welfare and safety. Our state of the art manufacturing facility is a depiction of our progressive vision. Having a state of the art HVAC system, we guarantee the best possible environment for our workers and ultimately our products. The HVAC system was designed according to cGMP regulations and production requirements. The system was validated by an independent engineering company and Ministry of Health-Pakistan. Our manufacturing equipment has one virtue in common, which is eminence. Technical staff at Bio-Labs is well versed with contemporary manufacturing techniques and boasts impressive experience of technical operations. Summing all these virtues the outcome can only be a flawless product.

Specialized Products

We strive to develop specialized products particularly in the field of biological products. We are proud to be one of the select few manufacturers in Pakistan manufacturing poultry & livestock vaccines as well as lyophilized powders for injections for human use.

Quality Control & Quality Assurance

Our manufacturing site has the latest analytical instruments in our quality control department. We monitor quality assurance through standard systems that ensure the consistent quality of our products. A highly qualified and trained team of scientists, pharmacists, chemists and engineers work in our Research & Development and Operations departments, developing new products in an environment that celebrates continuous improvement in quality.

Research For Better Health

At Bio-Labs we have always believed in continuous R&D towards the development of newer pharmaceutical formulations. Our new product development program generally includes pre-formulation studies, excipient compatibility studies, analytical methods development and validation, formulation development and optimization, formal stability studies, and manufacturing process development. We also have a quality program dedicated to continuous improvement of product quality of running products.

Certifications & Awards

Our manufacturing facility is ISO 9001:2008 certified by AFAQ, the number one certification body in France, representing over 60 countries and having more than 37,000 sites certified. Our GMP compliant manufacturing plant has been recognized by the Ministry of Health, Pakistan in addition to being licensed by international regulatory authorities such as Saudi Arabia, Vietnam, Afghanistan, & Philippines.

Marketing & Sales Excellence

Our marketing philosophy is to offer quality products that are bioequivalent to the leader, at prices that are affordable to a diverse cross-section of the community, with a focus on scientific information dissemination. Being socially responsible and adding value to the medical community is an integral part of our philosophy.

The product portfolio which is selected, expanded and renewed according to new trends in medical treatments consists of research based products and branded generics under various therapeutic categories. Our company's innovative marketing strategies together with its strong marketing base have helped our products to be significantly positioned in their respective therapeutic areas.

Global Presence

Our aim is to create a major role for the company with regards to the development and sales of pharmaceuticals not only in Pakistan but on the international markets as well. Our export presence in Africa, Middle East, Far-East, and other Asian countries is the beginning of this aim.

Philanthropy

Corporate giving is at the heart of our organization. Vibrant communities consist of healthy individuals. We are committed to making a positive difference in the communities in which we operate. Through charity and outreach, we spread awareness and bring relief where it is needed most.

Save the Children

WWF

Business Partnerships

Our goal is to create new business opportunities with reliable collaborators and strengthen our portfolio both in existing and targeted markets by the establishment of new business units, companies and joint ventures.

In order to expand our presence in local and international markets, we are open to communicating with international and local companies for successful collaborations and discussing all types of activities. Our state of the art machinery allows us to meet extravagant production demands in a timely manner and thus enabling our partners to achieve the eminence they desire in today's competitive health care industry.
