

# MAKING SUCCESS MORE CERTAIN

A CDMO with diverse manufacturing and packaging capabilities at its core. We help drive your drug programs to market success.

## About Bora

Dedication to strict quality standards, flexibility, outstanding experience and customer service has allowed Bora to become a reliable partner for pharmaceutical companies of various sizes.

Bora Pharmaceuticals specializes in formulation development, clinical and commercial manufacturing and packaging of complex oral solid dose, liquid, and semi-solid pharmaceutical products.

From our world-class sites in North America and Asia, we deliver drug products with unparalleled quality to more than 100 markets around the world. Bora's teams, technologies, and facilities work seamlessly together to enable our clients to deliver much-needed therapeutics to patients worldwide.

## Why Choose Us?

### Our Facilities

Bora owns and operates six state-of-the-art cGMP manufacturing facilities in Taiwan and Canada that are built to the highest international standards for development, manufacturing, packaging, and analytical testing.

### Our Capabilities

- Complex Oral Solid Dosages (tablets, granules, and capsules)
- Liquids (solutions, suspensions, ophthalmic and nasal sprays)
- Semi-solids (creams, lotions, and gels)
- Sterile Ophthalmic (solutions, suspensions, ointments, nano-suspensions, nano-emulsions, gels & creams)
- Pharmaceutical products for clinical through commercial manufacturing

### Our Drug Delivery Technologies

- Immediate Release, Controlled/Extended Release (sustained, pulsed, modified and delayed)
- Extrusion/Spheronization
- Bilayer Tableting
- Laser Drill
- Solvent Film Coating

## cGMP Manufacturing

Bora has the capability and flexibility to take on demanding projects which require tailored processes. We offer contract services ranging from development, scale up, process optimization, tech-transfer, commercial manufacturing, and stability studies with specialized support through every stage of product life cycle from clinical to commercial supply.

## Packaging & Serialization

Bora's packaging lines cater to bottle, blister, tube, and liquid sachet packaging of oral solid dose, semi-solid, and non-sterile liquid products. We are equipped with OptelTrackSafe's Level 4 serialization and aggregation systems. We are well-versed in supplying compliant bottles, cases, and pallets to our global customers.

## World-Class Testing Labs

Our analytical teams are highly experienced in method development, transfer, validation, and verification against regulatory compendia such as USP / EP for raw material / finished product analysis, ICH for stability storage and testing, with numerous analytical test methods for simple to complex modified release products.

## Biologics Services

From cell-line development and formulation to analytical services and clinical cGMP manufacturing, Bora Biologics provides tailored development and manufacturing services to biologics developers. Bora Bio has the capability to deliver high-yield processes to launch even the most challenging molecules successfully.
