

Since its establishment in 1997, Cambridge Biomedical has supported biotechnology, pharmaceutical and CRO companies by developing customized assays for small and large molecules, biomarkers, diagnostics and medical devices. Our team has the technical expertise to develop, optimize and validate analytical methods to meet our clients individual needs. We are positioned to work with our clients in preclinical, clinical and postmarket stages of drug development.

Key Facts

Partners: We work with the four largest diagnostic reference laboratories and small, mid-sized and large pharmaceutical and biotech companies

Capabilities: Analytical support of pK/PD studies, biomarker development, clinical assay development/validation and specimen analysis

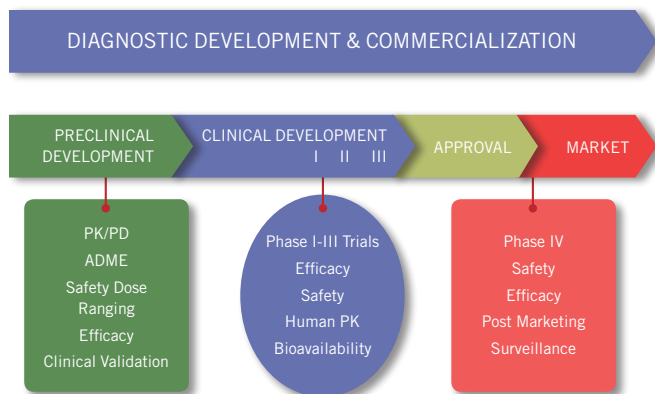

Quality: CAP Accredited, CLIA Certified, GLP Compliant, and FDA registered

Stage: Preclinical through phase IV and commercialization

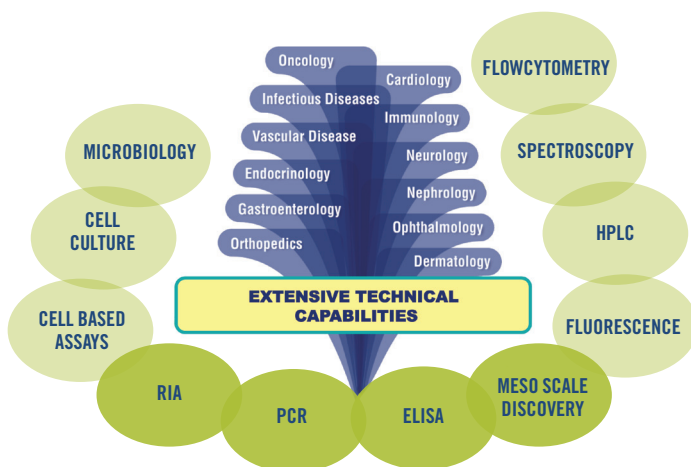

Assays: Developed over 150 assays

Volume: Currently processing more than 90,000 samples per year

Reach: Certified in all 50 states and currently supporting clinical trials in over 20 countries

To learn how Cambridge Biomedical can help your company's analytical testing needs please contact Business Development at 617.456.0760 or at info@cambridgebiomedical.com

By combining a focus on flexibility, speed and customer service with unsurpassed quality and technical expertise Cambridge Biomedical is able to initiate your project when you need and meet your deadlines.

Platforms and Examples

Spectrophotometry

Adenosine Deaminase

Albumin

Magnesium in Feces

Kinetic

Phosphatase Fractionation

Glutathione

Methemoglobin Reductase

RIA

Melatonin

Pancreastatin

Substance P

Neurokinin A

ELISA

Alphagalactosidase

Alpha 1 Antitrypsin

Antiphosphatidic Acid Antibody

Antiphosphatidyl Choline Antibody

Antiphosphatidyl Ethanolamine Antibody

Antiphosphatidyl Glycerol Antibody

Antiphosphatidyl Inositol Antibody

Aspergillus Galactomannan

Borrelia burgdoferi Antibody

Candida Immune Complex

C₆ *Borrelia Burgdoferi* peptide (lyme)

Complement C_{3A}

Complement C_{4A}

D-Lactate

Dissacharidases

Giardia Ab (IgG, IgM & IgA)

Hepatitis D Ag & IgM

Hepatitis D Total

Hepatitis E IgG & IgM

Hepatitis E IgG & IgM

Histoplasma Antigen

Human Placental Lactogen (hPL)

Lactoferrin

Mycoplasma pneumoniae IgA

Procalcitonin

Rabies

Transforming Growth Factor Beta 1 Antibody

Transglutaminase Antibody

Ion Specific Electrode

Chloride Fecal

Potassium Fecal

Sodium in Feces

IFA

Francisella Tularensis Ab

Latex Agglutination

Glycosaminoglycans

Nephelometry

IgG or IgM Total

Colorimetric

Iron in Liver

Flourometry

Porphyrins - Fecal

Porphyrins - Plasma

Porphyrins - Serum

Microbiology

Coagulase negative Staphylococcus

HPLC

Vitamin B3 (Niacin)

Vitamin B5 (Pantothenic Acid)

Porphyrins - Plasma Fractionation

PCR

Mycoplasma (Real Time Q-PCR)

Mycoplasma (Real Time PCR)

HPLC

Gel Clot or Chromogenic Kinetic LAL Endotoxin

Biological Assay

Vitamin B7 or H (Biotin)

Vitamin B5
