# About Us

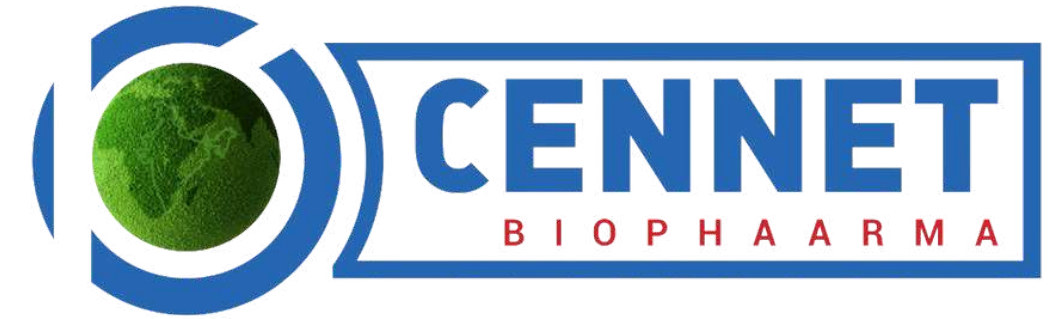

Cennet Biopharma Private Limited is a young and dynamic pharmaceutical company established in 2017 with a goal of becoming a leading producer of complex Active Pharmaceutical Ingredients (APIs) and Herbal extracts.

Cennet Biopharma is committed to producing high-quality plant-based active pharmaceutical ingredients. Our GMP certified manufacturing facility ensures that all products are manufactured to the highest standards. Our dedication to quality, research, and customer focus ensures that our buyers receive consistent, top-quality materials.

We believe “Quality is never an accident. It is always the result of intelligent effort”. Due to our emphasis on quality backed by advanced analytical instruments and an uncompromising team we ensure to deliver the highest standard of products to our customers.

# Our Values

## Quality

We comply to world class quality standards to ensure highest standard of products to our customers

## Responsibility

We believe we have a responsibility to the environment and community around us and we take proactive measure to improve them

## Development

Our company is an living organism with evergrowing products, skills, culture

# Production Facility

We have a GMP credited manufacturing facility located in Haryana, India.

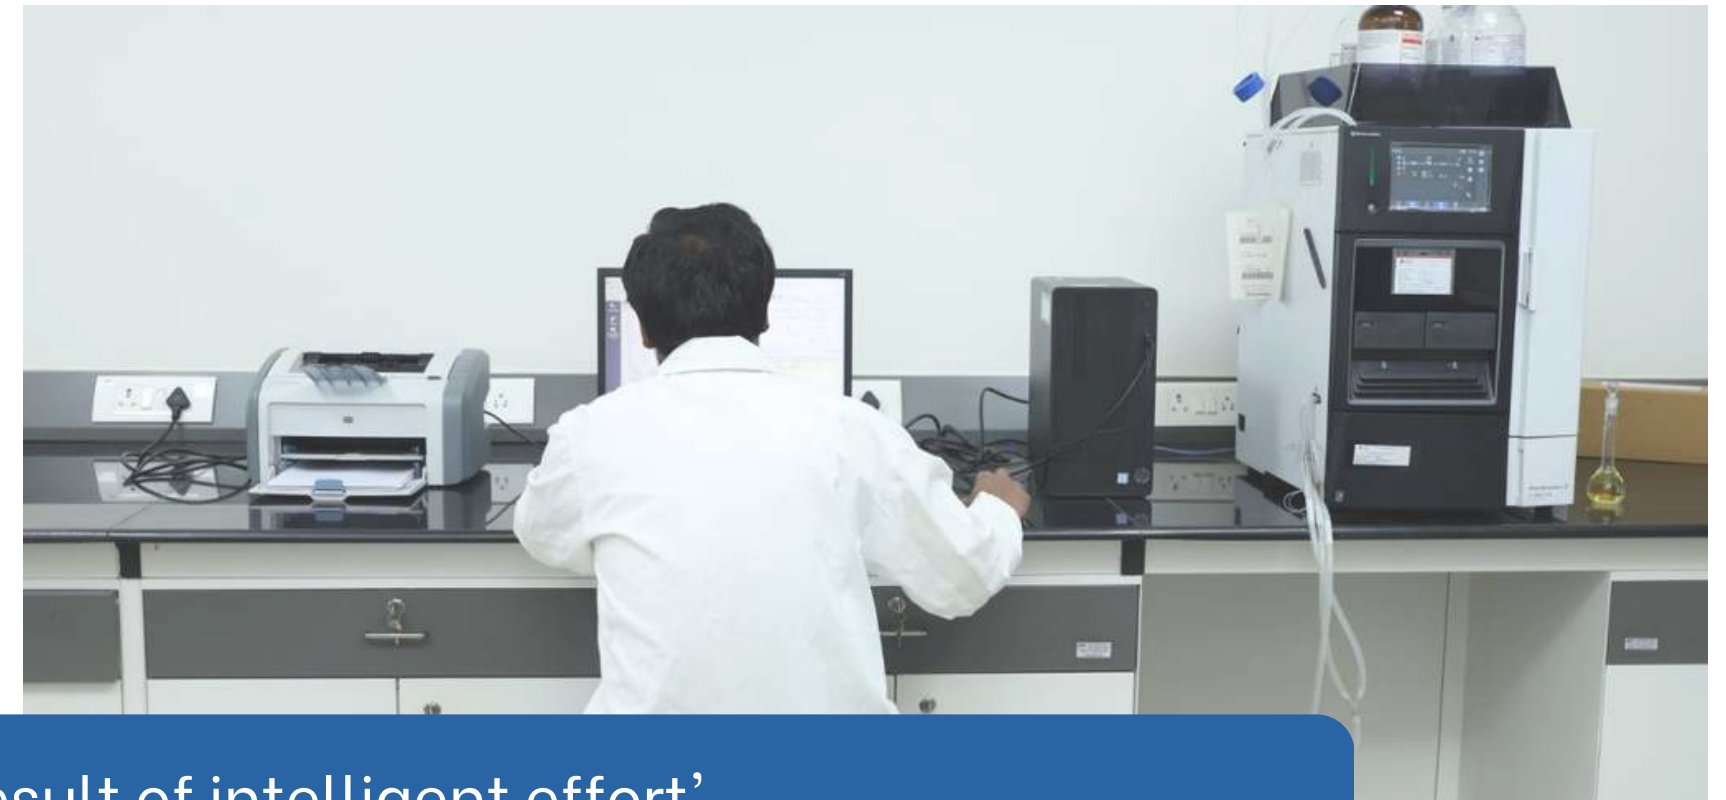

The Facility is designed and crafted as per world-class standards and takes into consideration of environmental and social responsibilities.

The facility boasts an array of the latest machines ranging from Extraction equipment to Downstream process equipment.

To ensure the highest grade of quality in our finished product we carry out the final processing and storage for finished goods at our state-of-the-art Clean Room.

# Quality Management

'Quality is never an accident. It is always the result of intelligent effort'

- John Ruskins

We strive by the moto and adopt this philosophy in our everyday production.

To ensure the highest grade of quality standard we have adopted Total Quality Management Systems and have an integrated full fledged Lab facility

The process begins from the very first step from selecting the raw materials to storage of the finished goods.

# List of Quality Documents

- Process Validation
- Analytical Method Validation
- Batch Manufacturing Records
- Standard Operating Procedures
- Equipment Qualifications
- Stability Study of Products
- Cleaning Validation
- Drug Master File

# Research and Development Facility

We believe continuous work in research is required for breakthrough in medical world and to do so we have an expert team backed by a full-fledged lab.

We believe a continuous approach is required for a new discovery and to do so we aim to strengthen our research and development wing by investing a part of company turnover.

Through our rigorous work we strive to compete in the market ensuring new offerings.
