

Centrient Pharmaceuticals is the global business-to-business leader in sustainable, enzymatic antibiotics, next-generation statins and anti-fungals. We produce and sell intermediates and active pharmaceutical ingredients (APIs), as well as our own tablets, capsules and other finished dosage forms (FDFs).

First established in 1869, our story has since been one of constant evolution and innovation. Today, we are a company 2,200-people strong with operations on four continents.

More than this, we are a pharmaceutical company with a clear Purpose: to improve lives by being at the centre of sustainable and accessible healthcare.

Our company has a common focus that unites each of us in our mission: across our global operations, we are committed to ensuring Quality, Reliability and Sustainability to customers, partners, patients and the world at large.

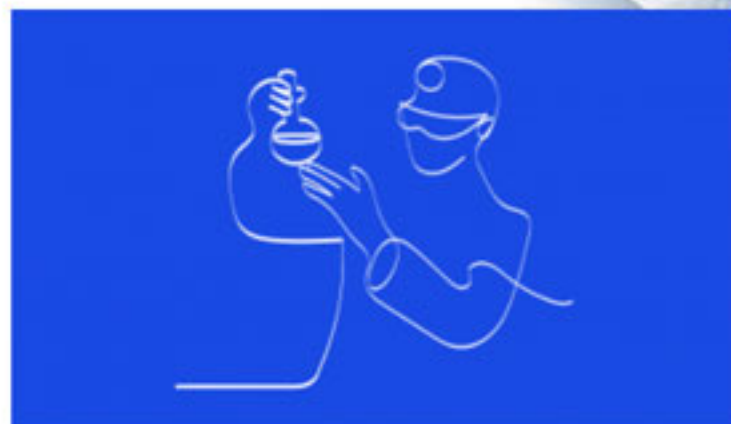

Moving forward, our vision is to be the leading, diversified and fully integrated partner to generics marketers.

Active Pharmaceutical Ingredients (APIs)

Our longstanding reputation for producing and marketing high-quality and sustainable active pharmaceutical ingredients (APIs) extends around the world

Antibiotics

Statins

Anti-Fungals

**Our Active Pharmaceutical
Ingredients Portfolio at a
glance**

Quality: We deliver unparalleled product strength

With our unique enzymatic PureActives platform

Quality: We go beyond compliance.

Our comprehensive Safety, Health and Environment policies go beyond cGMP

Finished Dosage Forms (FDF)

We provide high-quality, reliable and sustainable finished dosage forms (FDF) for people in need of healthcare.

Beta-lactam Antibiotics

Statins

Anti-Fungals

Sustainability: Leading the way – with responsible production

Our innovative, patented enzymatic platform replaces the traditional 13-step antibiotic production process, eliminating the use of solvents and other chemicals.
