CSPC Profile

CSPC Pharmaceutical Group Co., Ltd. (CSPC) was established in 1997. Since the very beginning, CSPC has always stuck to the mission of "All for better medicine, all for a healthier world." Thanks to the innovation strategy, the annual sales revenue for 2021 reaches over RMB 41 billion. Now CSPC has become an international innovative enterprise with 27,000 employees worldwide. One of the subsidiaries, the Hong Kong-Listed Company (01093.HK), with market value of 100 billion, is a constituent stock of the Hang Seng Index (HSI), and further included in the world's top 1,000 pharmaceutical companies list (No. 25). CSPC commits to improving people's life and health via providing best services to the patients in the globe.

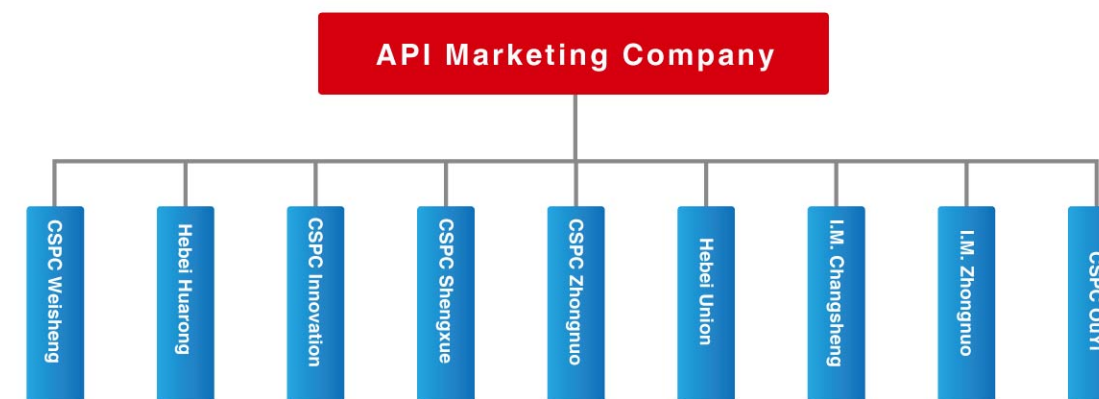

CSPC has established a diversified product system which mainly consists of three sectors, namely finished drugs, APIs and functional foods. The IND of mRNA vaccines is approved in 2022. While extensively involved in the global drug innovation, CSPC has been actively responding to the need of the community. In the therapeutic areas of cardio-cerebrovascular, oncology, etc., innovative drugs including NBP, Conjupri, Jingyouli, Duoenda, Keaili, Duomeisu and Mingfule have been already launched. Duoenda is the world's first listed mitoxantrone liposome product independently developed by CSPC. NBP, Conjupri and Jingyouli are all awarded with the second prize of National Science and Technology Progress, the highest national award in the pharmaceutical field.

CSPC is devoted to solving global health problems and benefiting more patients with innovative products. Conjupri for the treatment of hypertension is the first innovative drug developed by Chinese pharmaceutical company that fully approved by the FDA, and now commercially available in the US.. Up to date we have 14 innovative drugs undergoing clinical trials overseas, 7 products have been approved by the FDA for orphan drug designation, and 21 ANDAs have been approved by FDA and are commercially available in the U.S.. The group has been filing NDA applications in China as well as U.S. and Europe so as to reach people in need in every corner of the world.

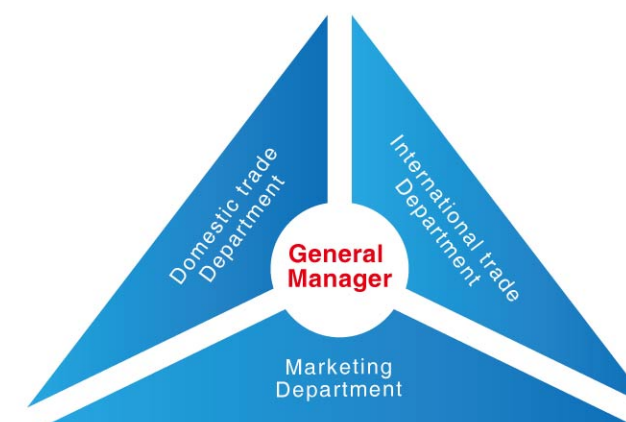

In the future, CSPC will seek more cooperation with medical institutions, research institutes, pharmaceutical companies, and other organizations, integrate global resources, and jointly improve accessibility of new drugs by continuously innovating. We will keep striving to contribute to the humans health and make the world a better place to live.
