

ERT EDUCATION & TRAINING

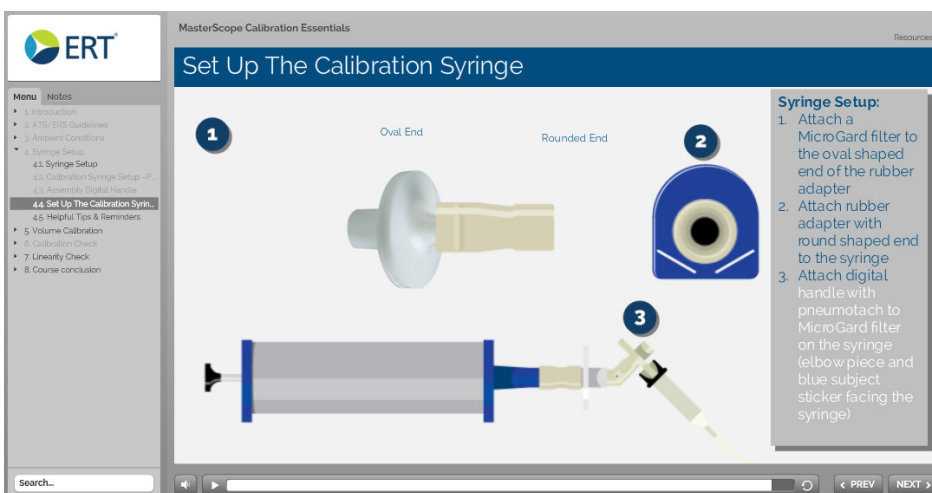

Optimize site performance, increase efficiency and deliver the best data

LEVERAGE FLEXIBLE AND COMPREHENSIVE EDUCATION AND TRAINING

Inconsistent measurements and incorrect use of data entry tools can result in poor data quality and missing data, extending study timelines, increasing budgets and compromising regulatory submissions. In addition, traditional education and training programs for site investigators and staff can be costly and time-consuming if not properly executed.

Appropriate, consistent training that is delivered progressively will improve data collection practices and ensure quality data collection. When this training is delivered using flexible methods that are tailored to the study, it can be particularly effective.

E-LEARNING SUPPORTS PROGRESSIVE, JUST-IN-TIME SITE EDUCATION

PROGRESSIVE EDUCATION AND TRAINING IMPROVES STUDY OUTCOMES

With ERT Education & Training, you can optimize site performance, increase efficiency and increase data quality for efficacy and safety claims. Our dedicated in-house team of 50+ training professionals includes master instructional designers; seasoned, credentialed trainers with clinical trial and cardiopulmonary experience; cross-product trained, multicultural and multilingual training project managers located worldwide; and administrators.

Our team works directly with you to develop the most appropriate and customized program for each protocol. We also offer a range of value-added services, including consulting, content design and development, implementation, evaluation and data analytics and administration.

Reinforce long-term learning

Progressively reinforce learning with flexible options, including investigator meetings, on-site training, eLearning, on-device learning, remote site training and proficiency monitoring and enforcement.

Drive quality with a blended approach

Leverage one of the most comprehensive and adaptable education and training eLearning systems as your training and education solution. We provide a blended approach to site education and training to optimize performance and data quality.

Leverage innovative site education and training

The ERT Learn system incorporates adult learning best practices and innovations which you can use to unify your site learning and training opportunities.

CONFIDENCE AT EVERY TURN

We have over 50 years of combined clinical, therapeutic and regulatory experience as well as technology and process-related insights. Backed by our expertise in conducting and supporting clinical trials, we developed our education and training solutions to ensure data quality and efficiency. Rely on our expertise to help you bring clinical treatments to market faster — and with confidence.

ERT EDUCATION & TRAINING
