

ERT PATIENT ADHERENCE & PERSISTENCE

Help patients comply with their treatment regimen

IMPROVE MEDICATION ADHERENCE WITH MONITORING AND SUPPORT

Poor compliance with treatment regimens is a drain on global healthcare systems. Even the most well-intentioned patients may encounter unexpected barriers to adherence such as a change in their condition, medication tolerance or simply everyday life distractions. With the right support programs, patients can be empowered to better manage their treatments, and ultimately their health.

BETTER PATIENT ADHERENCE AND PERSISTENCE

We provide tailored patient interfaces that include the medication regimen, personalized portals and dashboard reports. In addition, tested and verified personalized training is provided through the same portal, for easy access to all treatment regimen information in one place. No more questioning when and how to take the medication, use medical devices or manage health.

Medication management

Support patient persistence with adherence alerts and reminders and instructional preparation videos for medication application, ingestion or infusion. Medication self-tracking and monitoring further improve persistence.

Personalized patient portal

Engaging portal features include medication preparation, medical device use training, appointment reminders and disease updates. Dashboards enable quick reference of health trends.

Adaptive health stage content

Personalized content is customized to the individual stage of each patient's health journey. Delivering the right information and educational content in the right way at the right time provides personalized support.

CONFIDENCE AT EVERY TURN

We have over 50 years of combined clinical, therapeutic and regulatory experience as well as technology and process-related insights. Using this experience and these insights, we help you ensure patient adherence and persistence to treatment regimens.

ERT PATIENT ADHERENCE & PERSISTENCE
