

ERT PATIENT COMMUNITIES

Empower patients to actively take control of their health

IMPROVE PATIENT LIVES THROUGH MEANINGFUL CONNECTIONS

Many conditions can leave patients feeling isolated, without sufficient information to understand their disease or treatment and disconnected from the world around them. A better understanding of the condition and the ability to connect with others with similar experiences help patients to engage with their treatment and have a greater sense of control over their health.

**EMPOWER PATIENTS
WITH A GREATER
SENSE OF CONTROL
OVER THEIR HEALTH**

**ENABLE PATIENTS TO SHARE EXPERIENCES AND
ACTIVELY TAKE CONTROL OF THEIR CONDITION**

PUT POWER IN PATIENTS' HANDS

ERT provides the tools for patients to connect with others and their physicians for meaningful conversations about their health and expectations of their disease and treatment.

Facilitate patient conversations

Patient communities facilitate peer-to-peer and patient-physician conversations for better health. Patient privacy within these communities is managed according to regional regulations and guidance.

Integrate physicians and patient advisory groups (PAGs)

The powerful platform provides leading edge, near real-time data to help physicians advance disease knowledge and ultimately improve treatment outcomes for patients.

Gather real-world patient data

Gather evidence, enhance learnings, recruit and promote further clinical research by maintaining engaging patient communities.

CONFIDENCE AT EVERY TURN

We have over 50 years of combined clinical, therapeutic and regulatory experience as well as technology and process-related insights. We understand the everyday challenges faced by patients and aim to create engaging services to support them throughout their health journey, and provide a greater sense of control over their health.
