

STERILE MANUFACTURING

FINISHED DOSAGE FORMS

EXPERTISE

- 10 years of experience in Fill & Finish
 - Liquid, freeze dried, suspension, powder
- Authorizations for all DS except sexual hormones, cephalosporin/ β -Lactam
 - Biotech product, nanocarrier, highly potent product, controlled substance
- Processing of various small molecules to biologics
 - Amino acid, peptide, oligonucleotide, plasmid vector, interleukin, protein, immunoglobulin, interferon, mAb, ADC, inactivated bacteria ...

 
Chemical & biologic
entities

Highly potent
& cytotoxics

SERVICES

Compounding

- Aseptic compounding
- Isolators
- Weighing area

Fill & Finish

- Aseptic filling
- Automatic and manual filling lines
- Isolators

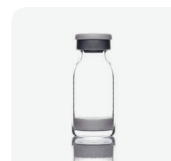

Freeze-drying

Pilot batches

150+
Process
transfers

batches

STERILE MANUFACTURING

FINISHED DOSAGE FORMS

CAPACITIES

Bulk	From < 0,5 L & up to 20 L
Vials	Up to 5,000 units
Syringes - Cartridges	Up to 5,000 units
IV Baqs	Bulk up to 20 L

Other packaging upon request

**Small size
of bulk
volume**

**Small filling
volumes**
from 0.5mL &
up to 50mL

FACILITIES

FILL & FINISH

■ Idron | FRANCE

- 2,200 m² / 24,000 ft² dedicated to manufacturing
- 480 m² / 5,167 ft² classified C clean rooms
- Storage capacities at RT, 2–8°C, -20°C, -80°C
- Experienced staff in sterile manufacturing
- State-of-the-Art equipment per industrial standard but designed for low scale batches
- Total waste management strategy (disposable materials & solvents)
