

### **Section 3.2.S.2.1.1 Company Profile**

FDC Limited is more than 70 years old, engaged in the business of manufacturing and marketing pharmaceuticals, bulk drugs and specialized infant foods and has a well-established position in the Indian market. We have in all, six manufacturing facilities, one for bulk drugs and five for formulations. Our bulk drug plant is approved by the US FDA, and we hold Drug Master File (DMF) Reference Numbers and Certification of Suitability of the Monographs of the European Pharmacopoeia (CEP) for several of our products which are exported to European, U.S., Japan and other countries.

Our formulations units are based on the modular concepts and belong to the fourth generation of Pharma 2000 Series. These plants conform to the latest GMP standards applicable internationally. This is backed up by a team of highly qualified Pharmacists, as well as experienced and dedicated work force. All our equipment used in the manufacture of formulations conforms to the GMP requirements and have built-in automation to operate as compact lines, wherever required.

We have the capabilities of handling high potency products which require specialized skills to ensure product as well as human safety. Our facilities have been approved by local FDA, WHO and the Medicines Control Council of South Africa for registration of our products in those countries.

Our formulations of the various dosage forms are well accepted in the market and we are the leaders in Ophthalmic and Oral Rehydration Salts (O.R.S.), in India.

To be in line with international packaging, we are offering our ophthalmic products manufactured on Automatic Liquid Packaging Machine with state-of-the-art Form Fill and Seal (FFS) Technology. We also have a wide range of ophthalmic products manufactured with the FFS technology. Our facility has been approved by US FDA and UK MHRA, for sterile ophthalmic dosages.

We have the necessary equipment, infrastructure, as well as human skills and expertise, to undertake manufacture of any sophisticated Pharmaceutical preparations. We also have necessary marketing strength to promote, as well as market such products.

We have well established R & D sections, both for bulk drugs and formulations, with pilot plant facilities for scale ups. We have also initiated development work in the area of biotechnology and have a well-equipped and sophisticated Research Laboratory. Our line of work is directed in the area of recombinant strains / cell line cultures.

While Ophthalmic and O.R.S. are our main lines of business, we are also operating in all other segments of the Pharmaceutical market in all their dosage forms.

We are manufacturing a range of Bulk Drugs, 80% of which are exported to the countries mentioned above. For your ready reference, we are giving below the list of Bulk Drugs manufactured in our Roha Plant.
