Globela Pharma is a leading small-scale contract manufacturer of novel dosage pharmaceuticals for use in clinical trials

- ❖ We Specialize in the **Phase I & Phase II** trials
- ❖ Dedicated facility for general solid Oral dosage & **Conventional** pharmaceuticals

Oncology (Anti Cancer)

We have dedicated WHO-GMP approved facility for Oncology solid oral dosages along with dedicated utilities and team of qualified & experienced technical staff.

Direct Compression Granules

Globela Pharma is one of the few companies present the pharmaceutical manufacturing value chain of Pharmaceutical Formulation Intermediates (PFIs) (DC) to Finished Dosages (FDs). We offer our customers all three components of the pharmaceutical manufacturing value chain to enhance flexibility and efficiency.

DC Have Financial Benefits

- Savings in capital expenditures and technical resources.
- Lower testing costs
- Increased asset utilisation
- Save development cost and Proven Technology Back up

Direct Compression Granules

Pharmaceutical Formulation Intermediates (Direct Compression Granules) -DC What is a DC ?

DC is the intermediate product between an API and a Finished Dosage. The proposition that DC could be outsourced as customer requirement without much technology risk at their end. Ready granules with proven quality and data of stability to meet international standard that transformed the conventional pharmaceutical manufacturing model by offering customers significant savings, fewer handling hurdles and higher efficiency.

The Company's concept is based on a 'ready-to-compress' mix of APIs and excipients that can be fed directly into a compression machine to manufacture finished dosages - a single step process.

We back our product lines with **cGMP .WHO** manufacturing infrastructure. To support our Direct compression Granules facility we have strong back word Tie up with API manufacturer for DMF and facility Like Ibuprofen , Metformin , Ciprofloxacin , Metronidazole , Paracetamol. Facilities meet the stringent requirements of demanding international regulatory authorities such as the WHO GMP .

Operational Benefits Stability: Outsourcing DC from a dedicated specialist like us makes it possible for products to retain their compression and other quality characteristics throughout their shelf-life

Desired properties: leading to finished dosage manufacturers getting favourable outcomes from their bioequivalence studies.

Dry Blending: We possess the capability for some PFIs to be dry-blended with other APIs without the need for further granulation to obtain homogeneous mixtures.

Direct Drum to Hopper product with Unique formula .

- Sustain released Direct compression granules – Metformin SR suitable to 500 mg , 850 mg & 1 gm Tablets
- Extended released
- Rapid released
- Test masking of formula for paediatric suspension
