

KEKULE PHARMA

Inspired by Life Driven by Science.

Kekule Pharma

is a leading intermediates and Active Pharmaceutical Ingredients (API) manufacturing company specializing in the development of innovative processes for the synthesis of a wide range of products.

Kekule Pharma undertakes custom synthesis and contract manufacturing. Value creation for our customers is at the core of what we do. We achieve this through a partnership with our customers and supporting them in meeting their goals in terms of quality, time and costs. Based in Hyderabad, the pharma hub of India, we have made our presence felt in the highly competitive field of APIs and intermediates, by offering customers the highest quality, cost-competitive products with a short development time.

As always, We stay true to our motto –

'Inspired by Life, Driven by Science'.

Services

We provide a complete solution spectrum for APIs & Intermediates ranging from contract manufacturing to custom synthesis.

Infrastructure

Our facilities, infrastructure and production capabilities keeping up with international standards are our major strength.

Opportunities

We have many exciting avenues for development via employment and collaborations. Let us work, learn and grow together.

About Us

Founded in 1986, Kekule has developed from a manufacturer of few molecules to a preferred vendor for many complex molecules requiring multistage synthesis. Working with customers across the world, Kekule has always leveraged its strengths in basic chemistry as well as chemical engineering to deliver high quality APIs and Intermediates in time and at competitive prices. Our value based approach to business has been a foundation for a mutually beneficial long term relationship with our customers.

Our employees, technology and infrastructure match the highest international standards. Our passion for science inspires and drives us to constantly innovate and pioneer new processes.

Our prolific teams of development experts strive hard with an innovative and novel mix of classical and modern chemical methodologies to meet the scientific challenges and produce cost-effective, high quality products. High standards of ethics, integrity, and responsibility towards our customers remain our top priority.

Services

Kekule undertakes exclusive manufacturing of APIs and intermediates. We specialize in producing products through novel processes, taking full advantage of our core competencies, equipment, and facilities.

Our superior chemistry and problem-solving skills coupled with our many years of experience help us in rendering value in terms of cost, speed and quality and we do so adhering to the highest standards of ethics and integrity.

- Drug Substance Manufacturing
- API Manufacturing
- Impurity Synthesis
- Contract Manufacturing
- Custom synthesis and process development in lab to establish proof of concept
- Scale up studies for any given process
- Reduction in cost of existing processes
- Commercial manufacture of APIs using patent non infringing processes in cGMP facilities
- Regulatory documentation, including DMFs (CTD format)
- Scale-up production from a few kgs to tons

API's

Abiraterone Acetate	Benfotiamine	Bicalutamide	Bortezomib
Busulphan	Capecitabine	Celecoxib	Chlorambucil
Citalopram Hydrobromide	Cytarabine	Dacarbazine	Docetaxel
Eletriptan	Escitalopram Oxalate	Etoricoxib	Famotidine
Gefitinib	Gemcitabine Hydrochloride	Imatinib	Irinotecan
Lapatinib Ditosylate	Melphalan	Nilutamide	Pantoprazole Sodium
Pazopanib	Pemetrexed	Quetiapine Hemifumarate	Telmisartan
Temozolomide	Tofacitinib Citrate		

Intermediates

Bicautamide	Celecoxib	Citalopram Hydrobromide
Eletriptan	Etoricoxib	Famotidine
Nilutamide	Nizatidine	Pantoprazole
Pazopanib	Quetiapine	Telmisartan
Escitalopram	Fexofenadine	Modafinil
Trandolapril	Duloxetine
