

Kewpie's New Cross-linked hyaluronic acid

A simple cross-linked technology of just mixing two kinds of hyaluronic acid derivatives

Cross-linked reaction

Hyaluronic acid derivative A

Hyaluronic acid derivative B

The advantages of the new technology

To control of **Cross-linked reaction time** and **hardness of the gel**

To become **gel after injecting** into the body

To **sterilized by filtration** during the production process of the products

**Our team will be attending CPHI Barcelona (Oct 24-26).
Welcome to our booth 6G24.**
