

KINSY is an independent chemical company, located in Murcia (Spain), having broad expertise in development, scale-up and commercial production of fine chemicals, with a strong focus on development and manufacturing of key pharmaceutical intermediates and APIs under cGMP.

Our mission

is to provide fully integrated development and manufacturing services for the fine chemical and pharmaceutical industry, by working in close collaboration with our partners.

Our vision

is to be regarded as an innovative and trusted business partner, offering competitive solutions with added value.

We value:

1 - Customer focus

We are committed to our partners, through collaboration and fluid communication, by providing them with technical, commercial, strategic and regulatory support for project success.

2 - Efficiency

Our business model is based on agility and flexibility, thanks to its horizontal structure and efficient processes which allow us to provide quick and competitive solutions to challenges and opportunities.

3 - People and teamwork

The key to our success is our people, whose talent and experience lead to quality results and whose passion and motivation bring commitment, fostered in an environment focused on professional development and growth. Teamwork and collaboration allow us to achieve our goals and to provide innovative business solutions to our partners.

4 - Continuous learning and improvement

We value continuous learning and improvement, based on a business model centred on people and knowledge as its main asset.

5 - Respect

We prioritize the health and safety of our employees, as well as the protection of our environment, in accordance with the principles of sustainable growth.

We take pride in our strengths:

1 - Personnel

Highly qualified, motivated and dedicated personnel who are deeply involved in projects in multidisciplinary teams, working in close collaboration and fluid communication with our partners toward project success.

2 - Expertise

Strong and broad expertise in organic chemistry at industrial scale, including special reactions and technologies.

3 - Flexibility

Flexibility to adapt our state-of-the-art facilities and business model to different projects and to our partners' specific needs.

4 - High quality

High quality and Environment Health and Safety (EHS) standards under EU regulations, accredited by successful audits by Competent Authorities and many international customers.

5 - Improvement

Competitive service by means of continuous innovation and optimized technology, based on our passion for continuous improvement.

6 - Delivery of solutions

As an efficient privately-owned company not burdensome by scale, we are capable of timely delivery of solutions to meet our partners' needs.

7 - Guaranteed confidentiality

Guaranteed confidentiality

Which allow us to become a trusted business partner by providing:

Reliable, fast, customer-oriented and competitive service.
