

A hand wearing a blue nitrile glove is holding a small glass test tube, positioned over a white rack containing several other test tubes. The background is a bright, out-of-focus laboratory environment with white equipment. The overall color palette is dominated by light blues and whites, creating a clean and professional aesthetic.

267 mg x 270 Caps.

# ECZANE PHARMA LABORATORY

Dr. Carlos Alberto Fernández founded Eczane Pharma Laboratory in 1991 on family value basis and 100% national capitals. His vision was creating a pharmaceutical company focused on improving patient's life quality with high level products accessible for the community. His passion and dedication guided our team towards sustained growth. Starting its activity with only 10 employees currently we achieve more than 100 people sharing the effort commitment for professional excellence.

The youngest generations inspired by hard work as a principle lead the company with innovative ideas that allows Eczane to consolidate its market position in Argentina and transcend the global scenario.

## MISSION

Contribute to health care improvement through research, development and elaborating pharmaceutical products under the highest quality standards offering an effective therapeutic option.

## VALUES

Focused on Patients & Clients  
Quality Commitment  
Continuous Improvement

# STRUCTURE

Eczane Pharma count with modern production plants that obey to the international Good Manufacturing Practices (GMP) and MERCOSUR certificates.

## ONCOLOGY ORAL SOLID PRODUCTION PLANT

Cytostatic and antineoplastic oncological products elaboration exclusively for third parties.

## GENERAL SOLID PRODUCTION PLANT

Solid formulations production as capsules, tablets and coated tablets for third parties and Eczane' portfolio.

## COSMETIC PRODUCTION PLANT

Comprehensive product elaboration process from development up to delivery of semi solid and liquid formulations.

Each production plant has an independent quality control department, guaranteeing our products soundness and complying with the demanding international regulations in more than 20 countries.

Our interdisciplinary professional team dedicated to research and development, provides solutions for our customers' needs through all stages of product development process:
