*Therapeutic Equivalence Evaluations (TEE) Rating Glossary

AA Drug products coded as AA contain active ingredients and dosage forms that are not regarded as presenting either actual or potential bioequivalence problems.

NOTE: A drug product that has a therapeutic equivalence to another drug product can be expected to have the same clinical effect and safety profile as the prescribed product, and therefore can be substituted.

AB Drug products are coded as AB if they meet bioequivalence requirements.

BX Rating means that the available data on the generic drug products are insufficient for FDA to determine therapeutic equivalence with Concerta.

NR Not rated.

NA Not applicable.
