

About Us

Rooted in pharma, driven by research, and fueled by innovation, MediPharm Labs specializes in the production and manufacturing of purified, high-quality Cannabinoid based derivatives and pharmaceutical ingredients.

MediPharm Labs obtained the first-of-its-kind **Drug Establishment License** in North America and is a full-service pharmaceutical company with international commercial distribution capabilities.

Our Mission

To be a trusted global leader in the industrial-scale manufacturing of high-quality, cannabinoid-based derivatives by utilizing industry-leading practices, purpose-built facilities, and an expert-backed research team.

MediPharm Labs aims to bring a pharmaceutical perspective to the cannabis industry. Working to internationally recognized pharmaceutical standards, we strive to provide top cannabis products that are pure, trusted and precisely dosable for patients and end consumers.

Canada

- ✓ **Drug Establishment Licence**
DEL is the first of its kind in North America and has been granted to MediPharm Labs. It allows us to sell Active Pharmaceutical Ingredients and Pharmaceutical Drug Products to GMP specifications and conduct pharmaceutical manufacturing.
- ✓ **Research and Development Licence**
Issued by Health Canada for human sensory testing. This allows MediPharm Labs to evaluate flavours, scents, textures and other sensory attributes of products during development to help ensure customers have a great experience with our products.
- ✓ **Natural Health Product**
Issued by Health Canada for manufacturing, packaging, labeling and/or importing natural health products for commercial sale in Canada
- ✓ **Cannabis Processing and Sale**
This certification enables us to sell to other license holders, authorized provincial/territorial retailers and federal medical sale license holders.
- ✓ **GMP Certified**
Authorized by Australia's Therapeutic Goods Administration to manufacture cannabis-based medicines and active pharmaceutical ingredients.
- ✓ **Cannabis Drug License**
Issued by Health Canada for the manufacture of a pharmaceutical drug containing cannabis. This leverages MediPharm Labs Drug Establishment License to allow us to manufacture cannabis-based medicines, following the same drug approval process as other prescription drugs.

Our Operations

All MediPharm Labs' product offerings begin with quality sourced and validated dried cannabis. We focus on four core standards: a stable supply chain of legal producers, highly vetted and safe product standards, reliable and consistent cultivars, and full suite of testing on every single batch of cannabis oil and finished goods.

Through wholesale and white label platforms from its GMP-certified facilities, MediPharm Labs formulates, tests, processes, packages, and distributes cannabis extracts and advanced cannabinoid-based products to domestic and international markets.

Our Facility

MediPharm Labs Canada is based out of its state of the art 70,000 sq. ft. facility in Barrie, Ontario. Utilizing a GMP certified space and ISO standard built clean rooms, we are committed to manufacture products of the highest quality and exceed regulatory requirements.

Land Acknowledgement

MediPharm Labs acknowledges that the land on which its Barrie Facility sits on is the traditional territory of the Anishinaabeg people. We also acknowledge the Wendat Nation (Huron), who also called this land home prior to the middle of the 17th century.

Science of Extraction

MediPharm Labs uses Supercritical CO₂ extraction for primary extraction, and short-path wiped-film distillation and centrifugal partition chromatography for further purification and cannabinoid isolation.

In contrast to alternative techniques such as hydrocarbon and alcohol-based extraction, supercritical CO₂ can be customized which results in extremely high and efficient yields, and offers the safest method of extraction. While the investment in technology is greater, we believe it is best-in-class for the production of pharma-quality products and an industrial-scale operation.

GMP Cannabis API

Bulk Wholesale Offerings

MediPharm Labs bulk wholesale offerings include concentrate, distillate or isolate based products in a wide variety of cannabinoid ratios.

[Request a Quote](#)

- ✓ **Cannabis Products**
tinctures, soft gel capsules, vape cartridges, Isolates, topicals, distillate, concentrate, and custom formulations
- ✓ **Consumer Packaged Goods**
cosmetics, food & beverage, nutraceuticals
- ✓ **Pharmaceutical Product**
over the counter or prescribed medications

White Label Production

MediPharm Labs provides a host of products and services, tailored to your needs:

- ✓ **Extraction and Distillation**
- ✓ **Formulation**
- ✓ **Sensory Testing**
- ✓ **Packaging/Labeling**
- ✓ **Distribution**
- ✓ **Export**

Clinical Trials

MediPharm Labs' Cannabis Drug Licence and expertise qualifies us to supply clinical trial material, assist in investigation protocol, and provide regulatory support. Our services include, but not are not limited to:

- ✓ **Provision of Clinical Trial Materials with ability to support commercial manufacture utilizing our CDL and DEL**
- ✓ **Preparation of Regulatory Support Document for Clinical Trial Submission**

MediPharm Labs has partnered with McMaster University for a number of approved trials. To learn more, enter your information below and a member of our team will be in touch

Academic Partnerships

MediPharm Labs is proud to partner with:

MediPharm Labs Supports Industry Development With Loyalist College Alliance

- ✓ **4-year Partnership Commitment**
- ✓ **Access to Applied Research Opportunities**
- ✓ **Donation of \$100,000 of Cannabis Derivatives Towards Study**
- ✓ **Hiring of Interns & Hosting Annual Cohort for Educational Lectures**

Advancing Understanding of Cannabis-based Medicines

MediPharm Labs is committed to medical cannabis research. For this purpose, we have established relationships with key academic health centers such as McMaster University and Toronto's University Health Network leveraging MediPharm's unique pharmaceutical experience with leading healthcare professionals involved in researching cannabis-derived therapies.

- ✓ **Meeting the unmet need of medical researchers to secure GMP certified medications for clinical trials**
- ✓ **MediPharm Labs provides not only the product but also the required Regulatory Support packages to facilitate clinical trial applications**
- ✓ **Multiple Randomized Controlled Trials have recently been approved by Health Canada featuring MediPharm products in indications such as Depression related sleep disorders, Post surgical pain treatment, and Opioid Sparing in chronic pain**
- ✓ **Plans to expand clinical trial support to International partners**

MediPharm Labs Brand

We are pleased to offer our own family of MediPharm Labs branded products that deliver high quality, innovative products to consumers and patients across Canada.

With our sophisticated, pharmaceutical-quality GMP certified platform and R&D capabilities, we are equipped to formulate premium products to meet current and evolving consumer needs. All of our branded products are produced using strict manufacturing standards to ensure the highest quality and purity.

MediPharm Labs' new line of pharmaceutical-grade products are available to patients and consumers in Canada.
