It works directly in the lungs to make breathing easier by reducing the irritation and swelling of the airways.
2	Besone 100 Inhalation	Beclomethasone Dipropionate IP 100 mcg	100 mcg	MDI	200 MDI	Anti Asthmatic Inhaler Anti-Inflammatory	Prescription & Medical device	Pharma	
3	Besone 200 Inhalation	Beclomethasone Dipropionate IP 200 mcg	200 mcg	MDI	200 MDI	Anti Asthmatic Inhaler Anti-Inflammatory	Prescription & Medical device	Pharma	
4	Besone 250 Inhalation	Beclomethasone Dipropionate IP 250 mcg	250 mcg	MDI	200 MDI	Anti Asthmatic Inhaler Anti-Inflammatory	Prescription & Medical device	Pharma	
5	Budesone 100 HFA Inhalation	Budesonide IP 100 mcg	100 mcg	MDI	200 MDI	Anti Asthmatic Inhaler	Prescription & Medical device	Pharma	Budesonide is an anti-inflammatory corticosteroid that exhibits potent glucocorticoid activity. Used for the treatment of Asthma and allergic rhinitis with comparatively lower incidence of systemic manifestations.
6	Budesone 200 HFA Inhalation	Budesonide IP 200 mcg	200 mcg	MDI	200 MDI	Anti Asthmatic Inhaler	Prescription & Medical device	Pharma	
7	Budesone 400 HFA Inhalation	Budesonide IP 400 mcg	400 mcg	MDI	200 MDI	Anti Asthmatic Inhaler	Prescription & Medical device	Pharma	
8	Csone 80/160 Inhalation	Ciclesonide IP 80/160 mcg	80/160 mcg	MDI	120 MDI	Anti Asthmatic Inhaler	Prescription & Medical device	Pharma	Ciclesonide a non-halogenated glucocorticoid (Anti-Inflammatory) for the treatment of Asthma and allergic rhinitis.
9	Fluzone 50 HFA Inhalation	Fluticasone Propionate IP 50 mcg	50 mcg	MDI	120 MDI	Anti Asthmatic Inhaler	Prescription/ Medical device	Pharma	Fluticasone belongs to a class of drugs known as corticosteroids(Anti-Inflammatory), used to control and prevent symptoms (such as wheezing and shortness of breath) caused by asthma. It works by reducing swelling (inflammation) of the airways in the lungs to make breathing easier
10	Fluzone 125 HFA Inhalation	Fluticasone Propionate IP 125 mcg	125 mcg	MDI	120 MDI	Anti Asthmatic Inhaler	Prescription/ Medical device	Pharma	
11	Fluzone 250 HFA Inhalation	Fluticasone Propionate IP 250 mcg	250 mcg	MDI	120 MDI	Anti Asthmatic Inhaler	Prescription/ Medical device	Pharma	
12	Formair HFA Inhalation	Formoterol Fumarate IP 12 mcg	12 mcg	MDI	120 MDI	Anti Asthmatic Inhaler	Prescription/ Medical Device	Pharma	Formair is a selective long active Beta 2 adreno receptor agonist. Formair because of its long action, is most appropriate to prevent asthmatic attack.
13	Flutfor 50 HFA Inhalation	Formoterol Fumarate IP 6 mcg & Fluticasone Propionate IP 50 mcg	6 mcg & 50 mcg	MDI	120 MDI	Anti Asthmatic Inhaler	Prescription/Medical device	Pharma	Flutfor contains two combination ingredients, namely formoterol fumarate and fluticasone propionate. Fluticasone is a corticosteroid(Anti-Inflammatory) that help reduce swelling and inflammation in the airways. Formoterol is a bronchodilators, which make the inhale and exhale process easier by relaxing the narrowed airways.
14	Flutfor 125 HFA Inhalation	Formoterol Fumarate IP 6 mcg & Fluticasone Propionate IP 125 mcg	6 mcg & 125 mcg	MDI	120 MDI	Anti Asthmatic Inhaler	Prescription/Medical device	Pharma	
15	Flutfor 250 HFA Inhalation	Formoterol Fumarate IP 6 mcg & Fluticasone Propionate IP 250 mcg	6 mcg & 250 mcg	MDI	120 MDI	Anti Asthmatic Inhaler	Prescription/Medical device	Pharma	

16	Forb 100 HFA Inhalation	Formoterol Fumarate IP 6 mcg Budesonide IP 100 mcg	6 mcg & 100 mcg	MDI	120 MDI	Anti Asthmatic Inhaler	Prescription/ Medical device	Pharma	Formoterol is a long-acting bronchodilator & Budesonide is a steroid(Anti-inflammatory). Budesonide & formoterol is a combination medicine used to control and prevent the symptoms of asthma in adults and children at least 6 years old. Budesonide and Formoterol Inhalation is a combination medicine used to prevent bronchospasm in people with asthma or chronic obstructive pulmonary disease (COPD)
17	Forb 200 HFA Inhalation	Formoterol Fumarate IP 6 mcg Budesonide IP 200 mcg	6 mcg & 200 mcg	MDI	120 MDI	Anti Asthmatic Inhaler	Prescription/ Medical device	Pharma	
18	Forb 400 HFA Inhalation	Formoterol Fumarate IP 6 mcg Budesonide IP 400 mcg	6 mcg & 400 mcg	MDI	120 MDI	Anti Asthmatic Inhaler	Prescription/ Medical device	Pharma	
19	Iprair	Ipratropium Bromide 20mcg	20 mcg	MDI	200 MDI	Anti Asthmatic Inhaler	Prescription/ Medical Device	Pharma	The anti-cholinergic effect of Ipratropium blocks the effects of cholinergic nerves, causing the muscles to relax and airways to dilate. It is also used to treat and prevent minor and moderate bronchial asthma, especially asthma that is accompanied by cardiovascular system diseases.
20	Salberone L 50 Inhalation	Levosaltamol 50 mcg Beclomethazone Dipropionate IP 50 mcg	50 & 50 mcg	MDI	200 MDI	Anti Asthmatic Inhaler	Prescription & Medical device	Pharma	Salbutamol is a combination of beclomethazone dipropionate and levosalbutamol, which have different modes of action and show additive effects. Levosaltamol is the active (R)- enantiomer of the racemate, salbutamol. It is a single-isomer, beta 2-agonist that differs from racemic salbutamol by the elimination of (S)-salbutamol, which is inactive. Levosalbutamol has a highly selective action on the receptors in bronchial muscle, resulting in bronchodilation. Beclomethazone dipropionate is a synthetic glucocorticoid with a potent anti-inflammatory activity and weak mineralocorticoid activity. This combination of levosalbutamol and beclomethazone dipropionate is specially provided for those patients who require regular doses of both drugs for treatment of their obstructive airways disease. This combination of Levosalbutamol and Beclomethazone Dipropionate is specially provided for those patients who require regular doses of both drugs for treatment of their obstructive airways disease.
21	Saliprair L 20 Inhalation	Levosaltamol 50mcg Ipratropium Bromide IP 20 mcg	50 mcg & 20 mcg	MDI	200 MDI	Anti Asthmatic Inhaler	Prescription & Medical device	Pharma	Saliprair L 20 is a combination of the beta 2-adrenergic bronchodilator, levosalbutamol sulphate, and the anticholinergic bronchodilator, ipratropium bromide.

22	Bonair L Inhalation	Levosulbutamol Sulphate IP 50 mcg	50 mcg	MDI	200 MDI	Anti Asthmatic Inhaler	Prescription & Medical device	Pharma	Levosulbutamol is beta 2-adrenergic bronchodilator. acts as a functional agonist that relaxes the airway irrespective of the spasmogen involved, thereby protecting against all bronchoconstrictor challenges.
23	Salbesone Inhalation	Salbutamol 100 mcg Beclomethazone Dipropionate IP 50 mcg	100mcg/50 mcg	MDI	200 MDI	Anti Asthmatic Inhaler	Prescription/Medical Device	Pharma	Salbutamol is a short-acting beta-2 adrenergic agonist & Beclomethazone dipropionate is a synthetic glucocorticoid with a potent anti-inflammatory activity. Salbutamol plus Beclomethazone may be used effectively in the prophylaxis of early and late asthmatic reactions.
24	Saliprair HFA Inhalation	Salbutamol 100 mcg Ipratropium Bromide IP 20 mcg	100/20 mcg	MDI	200 MDI	Anti Asthmatic Inhaler	Prescription/Medical Device	Pharma	Combination of inhaled Ipratropium Bromide (Muscarinic antagonist) and Salbutamol (short acting beta 2-adrenergic agonist) provides greater bronchodilation than mono therapy with Salbutamol alone in acute severe asthma.
25	Bonair Aerosol Inhalation	Salbutamol Inhalation 100 mcg	100 mcg	MDI	200 MDI	Anti Asthmatic Inhaler	Prescription/Medical Device	Pharma	A short-acting beta-2 adrenergic agonist that is primarily used as a bronchodilator agent to treat ASTHMA
26	Salmair HFA Inhalation	Salmeterol Inhaler 25 mcg	25 mcg	MDI	120 MDI	Anti Asthmatic Inhaler	Prescription/ Medical Device	Pharma	Salmeterol is a long-acting beta2-adrenergic receptor agonist drug. It works by relaxing muscles in the airways to improve breathing. Salmeterol works in the airways by relaxing muscles and opening air passages to improve breathing.
27	Fluzal 50 HFA Inhalation	Salmeterol 25 mcg Fluticasone Propionate IP 50 mcg	25 mcg & 50 mcg	MDI	120 MDI	Anti Asthmatic Inhaler	Prescription/Medical Device	Pharma	Combination of Salmeterol (A long-acting β_2 -adrenergic receptor agonist) and Fluticasone (A synthetic glucocorticoid) - used for the treatment of asthma and chronic obstructive pulmonary disease.
28	Fluzal 125 HFA Inhalation	Salmeterol 25 mcg Fluticasone Propionate IP 125 mcg	25 mcg & 125 mcg	MDI	120 MDI	Anti Asthmatic Inhaler	Prescription/Medical Device	Pharma	
29	Fluzal 250 HFA Inhalation	Salmeterol 25 mcg Fluticasone Propionate IP 250 mcg	25 mcg & 250 mcg	MDI	120 MDI	Anti Asthmatic Inhaler	Prescription/Medical Device	Pharma	
30	Bontair Inhalation	Tiotropium 3 mcg	3 mcg	MDI	120 MDI	Anti Asthmatic Inhaler	Prescription/ Medical Device	Pharma	Tiotropium bromide is a long-acting, specific, muscarinic receptor antagonist referred to as an anticholinergic used to prevent bronchospasm (narrowing of the airways in the lungs) in people with bronchitis, emphysema or COPD (Chronic obstructive pulmonary disease)
31	Fortropium	Tiotropium 3mcg and Formoterol Fumarate 6mcg	3mcg/6mcg	MDI	120 MDI	Anti Asthmatic Inhaler	Prescription/ Medical Device	Pharma	This is a metered dose inhaler containing a combination of two active ingredients; formoterol fumarate dihydrate (6 mcg), a long-acting beta-agonist, and tiotropium bromide monohydrate (3 mcg) a long-acting anticholinergic used to treat chronic obstructive pulmonary disease (COPD).
32	Fortropium-C	Tiotropium 3mcg+Formoterol 6mcg+Ciclesonide 200mcg	3 mcg/6mcg/200mcg	MDI	120 MDI	Anti Asthmatic Inhaler	Prescription/Medical Device	Pharma	The combination of Tiotropium, Formoterol and Ciclesonide will help in targeting different aspects of COPD viz. bronchodilation through different mechanisms and the inflammation with inhaled steroids. Tiotropium bromide is a long-acting, specific, muscarinic receptor antagonist, referred to as an anticholinergic. Formoterol is a potent long-acting selective beta2-receptor agonist, which acts by binding to the beta2 receptor in the airway. Ciclesonide is a synthetic glucocorticoid with a potent anti-inflammatory activity and weak mineralocorticoid activity.
33	Fenoiprair	Ipratropium Bromide 20 mcg & Fenoterol Hydrobromide 50 mcg Inhalation	20 mcg/50mcg	MDI	200 MDI	Anti Asthmatic Inhaler	Prescription/ Medical Device	Pharma	Fenoiprair is a fixed combination of the anticholinergic agent ipratropium bromide (IB) and the β_2 -adrenergic agonist fenoterol hydrobromide. It is used for the treatment of asthma and COPD in a pressurised metered dose inhaler.
