

Innovative. Diversified. Committed to You.

Mission Pharmacal Company (“Mission”) is a privately held pharmaceutical company based in San Antonio, Texas. For more than 70 years, the company has been improving the lives of people, through every stage of life, by identifying unmet healthcare needs and delivering innovative, high-quality prescription, over-the-counter products and medical devices to meet these needs using only the purest ingredients and state-of-the-art methods of manufacturing. We are leaders in the therapeutic areas of women’s health, urology, and dermatology. Mission provides a comprehensive portfolio of product and service offerings that help Mission and other pharmaceutical companies more effectively deliver needed prescription and consumer products into the hands of physicians, pharmacists and ultimately, patients. **Our core areas of business include:**

- [Branded Pharmaceuticals](#)
- [Generic Pharmaceuticals](#)
- [Contract Development and Manufacturing](#)

Our founding principle has remained the same: We identify and deliver the best quality products to meet patients’ needs.

National Association of Boards of Pharmacy[®] (NABP[®])

Mission Pharmacal has earned Drug Distributor Accreditation from the National Association of Boards of Pharmacy[®] (NABP[®]). The Drug Distributor Accreditation, formerly Verified-Accredited Wholesale Distributor[®] (VAWD[®]), is for facilities engaged in the act of wholesale drug distribution.

Those wholesale distributors that achieve accreditation follow state and federal laws and NABP's criteria and proudly display the NABP Drug Distributor Accreditation Seal. To become accredited, facilities must undergo a criteria compliance review, which includes: a rigorous review of their operating policies and procedures; licensure verification; a survey of a facility's operations; and screening through the [NABP Clearinghouse](#). Accredited facilities are reviewed annually and undergo an on-site survey every three years.

The Drug Distributor Accreditation plays a pivotal role in preventing counterfeit drugs from entering the United States drug supply: it helps protect the public from drugs that have been contaminated, diverted, or counterfeited. The U.S. supply of prescription drugs is produced and delivered to patients via a complex distribution path, and the accreditation helps ensure that the wholesale distribution facility operates legitimately, is licensed in good standing, and is employing security and best practices for safely distributing prescription drugs from manufacturers to pharmacies and other institutions.

Contract Development and Manufacturing

Overview

With over seven decades of experience, Mission has mastered the equilibrium of expertise and efficiency. Our mid-sized advantage allows flexibility, responsiveness, and unmatched support in executing your vision while providing a wide range of services for products at any stage of their life cycle.

Using the latest equipment, Mission manufactures high-quality prescription, over-the-counter products and medical devices in our FDA-registered, GMP facility. Our 275,000+ sq. ft. facility has the capacity for both small and large scale production and is located on our expansive Boerne, Texas campus. No matter the size and scope of your project, our experienced team will create a custom package to meet your individual needs and exceed expectations.

Generic Pharmaceuticals

BioComp Pharma, Inc. (“BioComp”) is a wholly-owned subsidiary of Mission Pharmacal Company with headquarters in San Antonio, Texas and a commercial office located in Doylestown, Pennsylvania. BioComp is uniquely positioned to prosper in the ultra-competitive and increasingly generics-driven pharmaceutical industry. Through our experienced leadership team and exceptional core capabilities, we are poised for further growth and success with our continued addition of select partners and an active research and development pipeline. In addition, we offer services to other companies lacking the commercial and distribution infrastructure to bring a generic drug to market. Our team’s extensive pharmaceutical experience, coupled with low overhead costs and flexible operations, means we can distribute your products quickly with maximum profitability.

Our complete turnkey and à la carte generics commercialization services include:

- Labeling coordination and printing
- Secure, environmentally controlled warehousing
- Fully-licensed U.S. distribution and commercial launch
- Electronic data interchange (EDI) capabilities
- National account sales management and marketing
- Accounting

Assurance of quality is paramount, so we only distribute products that are developed and manufactured in strict accordance with current Good Manufacturing Practices (cGMP).

If you have an interest in partnering with us, please contact Pete Valko, Chief Operating Officer at [215.489.9503](tel:215.489.9503) or busdev@biocomppharma.com.

Branded Pharmaceuticals

Mission Pharmacal is recognized in the pharmaceutical industry as an innovator and leader of high-quality, patient-friendly products in women's health, urology, and dermatology. With over 70 years of experience manufacturing and delivering pharmaceutical products, Mission has gained strong analytical knowledge and commercial expertise in marketing and selling across various therapeutic areas. Our experienced sales and marketing network offers coverage and customer focus throughout major markets in the United States. Our sales territories are aligned for co-promotion and co-marketing opportunities. In addition, we have global distribution partners covering 40 markets for our Mission products. Our integrated commercial team is positioned for product partnerships and opportunities in additional therapeutic areas.
