About Us

Pharmaffiliates Analytics & Synthetics (P) Ltd, is an integrated Contract Research Organization (CRO) services provider offering its expertise in Custom Synthesis (Reference standards, Impurities, Metabolites, Deuterium Compounds and other Reference Materials), Analytical Services (Method Development & Validation), Stability Studies, Formulation & Development (New Drug Delivery System), CRAMS, Quality Assurance and Regulatory Services with a right blend of competent people, state of the art infrastructure facilities, cutting-edge technology and certified processes to pump your development pipeline with time and cost advantages.

Our expertise will also enable you to combat in the highly competitive markets and also in acquiring the niche segments.

We desire to be your strategic partner for outsourcing and help you right from strategic planning of CMC blue-print to accelerating the filing and representation for NDAs and ANDAs submitted in any regulated and semi-regulated markets which can reduce your time and efforts for focusing them in your core areas of operations.

Our Vision

To empower the global pharmaceutical industry and support the dependent business entities in leveraging their core strengths of drug discovery, development and commercialization through joint efforts with our expertise in research.

Our Mission

To help the global pharmaceutical industry as a whole and as individual business entities. To help them leverage their strengths through our expertise in some niche research areas, so that they can deliver newer and better products in the healthcare sector to improve the quality of life of humanity at large.
