

# CONTAINMENT & SAMPLING TECHNOLOGY

- Fully contained top vessel sampling station (solids and liquid sampling from reactors, dryers, etc.)
- Automated sample lance with removable and interchangeable sample cup arrangement
- Option for taking a fixed sample volume at a fixed level within the vessel
- Nitrogen purged glovebox chamber
- Sample transfer either via continuous liner system or via Rapid Transfer Port
- The top sampler principle has also been combined with pressure and vacuum rated cabinets and simple (non-glovebox) cabinets for non-toxic applications
