Tablet Coating Machine

Quality Control

PT. Bernofarm believes that good marketing team will not succeed without guaranteed good quality of each single product delivered to the market. The quality begins with the incoming materials, through well validated processes to the finished goods. We are applying an integrated quality system, which is not limited only to the testing, but also includes such as non-conformance investigation to prevent the repetition, validating the manufacturing process, cleaning process, and test method, as well as implementing preventive maintenance program. We have also environment monitoring program. We build the quality into process by giving an adequate training to the employee, providing them with logical and up-to-date SOP's and applying sound statistical method. All products are released in accordance with established specifications, which based on know pharmacopeia such as USP, BP, DAB, and PI.

Research & Development

PT Bernofarm has a strong R&D team dealing with formulation, production process development, analytical test method development.
