

QUINTA

ANALYTICA

POSSIBILITIES OF CAPILLARY ELECTROPHORESIS

QUINTA-ANALYTICA s.r.o., Pražská 1486/18c, Praha 10 – Hostivař, 10200 Czech Republic

# Capillary Electrophoresis at QUINTA - ANALYTICA

GMP certified

- Equipment type: PA 800 Plus (SCIEX)
- Robust analytical platform
- Examples of tests:
  - High-resolution separation of charged compounds
  - Monoclonal Antibodies
  - Peptides and Proteins
  - Charge states distribution
  - Capillary gel electrophoresis and isoelectric focusing
  - Other biotherapeutics
- Fast Biotherapeutics Characterization
- Long in-house experience with CE
- US/FDA inspected company (10 FDA inspections passed)
- Other Complementary Tests available (laboratory for large and small molecules testing)
- Experiences with Biosimilars and other large molecules

**1. Multiple Applications, One Platform**  
Run multiple protein characterizations from a single system to improve your operational efficiency and effectiveness.

**2. Raw Unmanipulated Data**  
Have the confidence critical to both you and regulatory agencies for product submission and commercialization with raw, unmanipulated data.

**3. Reproducibility Matters**  
Get repeatable results with exclusive recirculating liquid coolant to control separation temperature precisely.

**4. Portability Matters**  
Easily transfer methods using robust, automated assays with proven portability - ideal for global multi-user, multi-instrument
