

## **Company Profile - Ransom Naturals Ltd.**

Ransom Naturals Ltd (RNL) is a leading developer of botanical extracts and natural products for the Pharmaceutical, Healthcare, Personal Care and Food & Beverage industries.

Our range includes active pharmaceutical ingredients (APIs), excipients and plant extracts which deliver flavour and functionality in food and beverages.

The RNL facility at Hitchin in the UK is a GMP accredited site approved by the MHRA and BRC certification will be in place by the end of 2015.

With a vast amount of natural product experience we are strong in product, process and method development, from lab through scale up to full commercial production. Sound finished formulation knowledge means we are perfectly positioned to deliver customer specific project solutions on time and in full.

In addition, we also characterise and standardise APIs to the exacting standards of a wide range of pharmacopeia or to in house customer specifications.

Furthermore, our products are available in a variety of finished forms. For example, liquid extracts, tinctures, semi-solid (soft) and powdered types to suit the needs of both customers and market sectors.
