Short visual presentation

"SEID is a company true to its mission and corporate values: integrity, ethics and commitment to quality with special respect to the Code of Ethics.

"Our strategy focuses particularly on the areas of Gynecology, Obstetrics and Fertility, of course without neglecting other courses of action, together with the maintenance and enhancement of certain traditional products in our company.

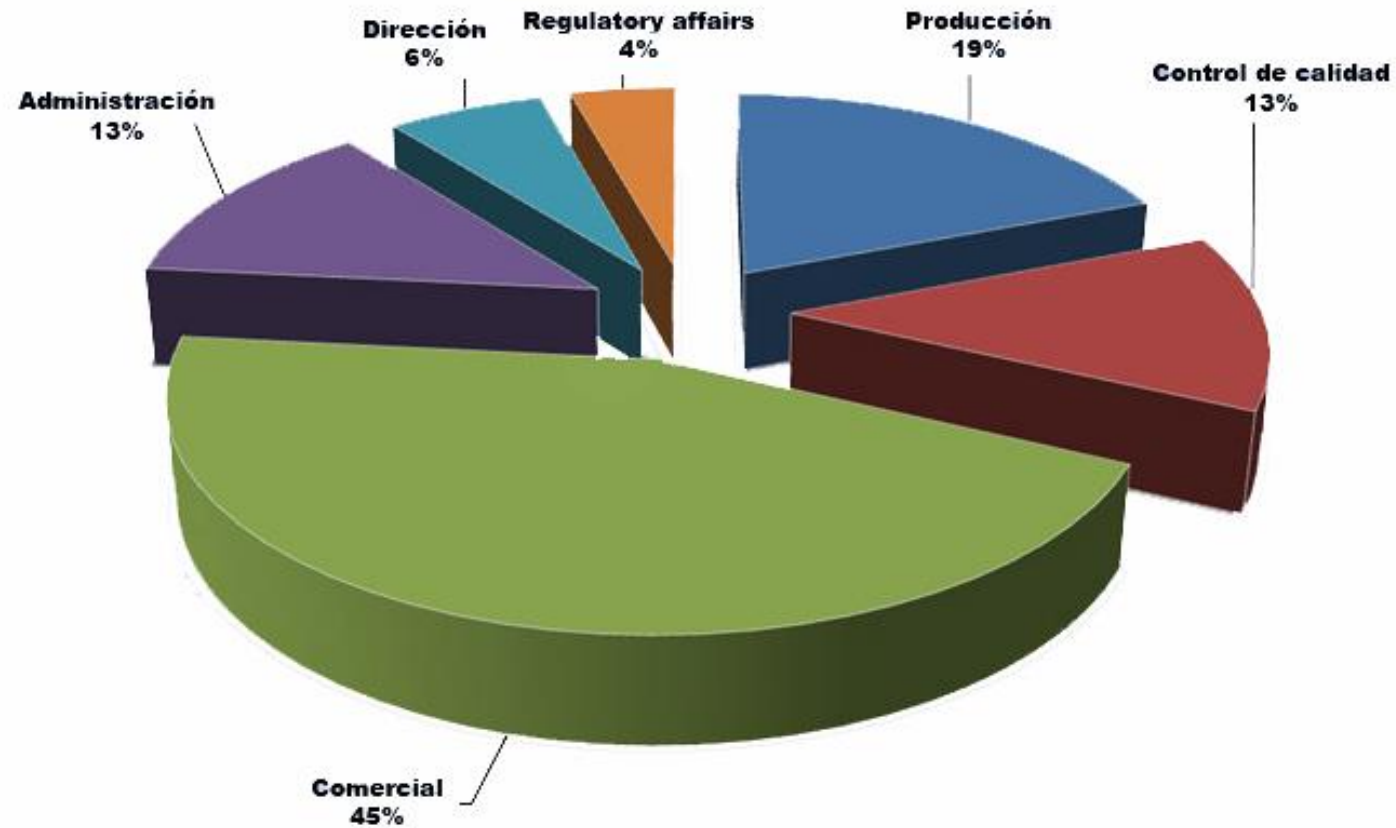

Mission and Vision

Mission: Support and assist the medical community by providing the best products and services, with the final aim of satisfying the basic sanitary needs of society. Our mission focuses on improving Women's Health and Fertility, offering them effective and innovative therapeutic solutions in this areas.

Vision: Consolidate our position in Spain as one of the national reference laboratories in the scope of Women's Health, especially in the areas of Gynecology, Obstetrics and Fertility.

Our best asset, people
