

MOVING THE INDUSTRY FROM **BATCH TO NOVEL  
CONTINUOUS PROCESSING (B2C) USING  
FRACTIONAL LOBE PROCESSOR**

STEER*Life* TECHNOLOGIES

- Novel hot melt extrusion (B2C - E)
  - Hot melt fragmentation\* (B2C- F)
  - Activated granulation\* (B2C- G)
- and more for
- Bioavailability and solubility enhancement
  - Containment
  - Drug abuse deterrence
  - Effervescence
  - Extended release
  - Taste masking

**CHANGING THE WAY WE  
MAKE AND TAKE MEDICINES**

**MOVING FROM 'QUALITY BY TESTING'  
TO 'QUALITY BY DESIGN'**

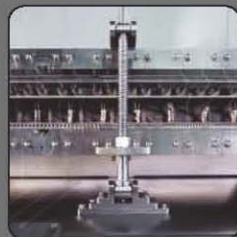

\*Patent-Pending

## FEATURES OF PROCESSES USING STEERLife's TECHNOLOGIES

- Continuous process eliminating hot spots and dead zones
- Self cleaning (self – wiping), no residues of earlier runs
- Economical development
- Ease of scalability (both linear and non-linear)
- Traceable (stratified continuous stream)
- Versatile (Easily adaptable to meet differentiated needs during process development)
- Quality by design (Well established risk and product quality)
- No metal dust contamination

## THE STEERLife OFFERING

### B2C TECHNOLOGY SOLUTIONS

- Large Volume Formulations / API
- Co-Processed API
- Containment

### LICENSING OPPORTUNITIES

- New Brands
- Life Cycle Management
- Line Extension
- Pediatric Dosage forms

### DIFFERENTIATED PRODUCTS

- High Performance Effervescent Granules
- Directly Compressible API
- Beyond Therapeutics (Over-the-counter, Nutraceuticals, Beverages)

## OUR GLOBAL CONTACTS

STEERLife INDIA
