

Over 40 years of trusted quality
in the pharmaceutical industry

We are global leaders in steroidal APIs

Sterling delivers cost-efficient synthesis, process development, solid state science, material characterisation, commercial manufacturing, micronisation, sonocrystallisation and life-cycle management solutions. We actively seek value for our customers and patients through science, bringing innovative solutions e.g. polymorphs, salts, co-crystals, and leveraging its expertise in respiratory. Sterling is engaged in the development of novel technologies to enable new treatment routes for critical diseases.

2020

In 2020 Sterling commissioned the first line in the new Maltese facility. This marked a new chapter in Sterling's history with the first Protein Kinase Inhibitors and LABA/LAMA products.

Service

A sum of the parts recognizing the entire supply chain is only as strong as the weakest link and the need for broad capabilities to meet evolving requirements

End-to-end API value chain management, leveraging science, technology and know how to deliver rapid, right quality value add solutions

Our goal is to understand the environment in which we operate and combine this with listening to our customers to deliver their targets in delivering high quality, value add, safe and effective medicines. An example of this broadening of capabilities is Sterling's SCIENCE BEFORE SALES -

SB(4)S program - offering greater insight into products and their performance to allow faster economic decision making by clients, Sterling offers an end-to-end partnership for the research, development and manufacture of APIs.
