

TECOLAND

About Us

Tecoland was established in 2002 as an Active Pharmaceutical Ingredients (APIs) supply partner. We are recognized for our ability to deliver high-quality products at cost-effective prices.

Tecoland represents the selected cGMP manufacturers with proven capabilities in organic synthesis, fermentation production as well as process and method development. Our extended international network gives us the leverage to contributing to the success of our customers and manufacturing partners in the APIs industry.

Tecoland works closely with customers in USA, Canada, Europe, Central America, and Asia, supplying active pharmaceutical ingredients for commercialized products and products under generic and new drug development, including those that are in various phases of clinical trials.

Tecoland is committed to providing the best services and becoming a reliable partner to your success in the ever-changing pharmaceutical landscape.
