Medical device in form of cream, rich in ingredients which form moisturizing – lubricating protective barrier. Created film eases side effect of some chemotherapeutics and biological medicines, like Hand-Foot Syndrome.

Broncho-Vaxom®

Broncho-Vaxom® is an immunostimulant that, by boosting the immune system, works to increase a person's natural defenses against a variety of respiratory pathogens. In clinical trials, it has been shown to reduce the incidence of exacerbations in people with COPD.

Uro-Vaxom®

Uro-Vaxom® is an extract of Escherichia coli, a germ responsible for the majority of urinary infections. It stimulates the immune system to increase the body's defences against a wide spectrum of urinary pathogens. Prevents recurrent urinary tract infections, in particular cystitis.
