In 2009, it was awarded the title of "Tianjin Enterprise Technology Center", and in 2013 it was included in the list of small giant growth companies that the mayor focused on fostering. In 2014, Hankang R&D Center was rated as "Tianjin Enterprise Key Laboratory", and its subsidiaries are Tianjin Hanrui Pharmaceutical Co., Ltd. and Tianjin Zepri Pharmaceutical Technology Co., Ltd.

1. Enterprise introduction

Tianjin Hankang Pharmaceutical Biotechnology Co., Ltd. is a high-tech enterprise with independent intellectual property rights and specializing in pharmaceutical R&D, production and sales. In 2009, it was awarded the title of "Tianjin Enterprise Technology Center", and in 2013 it was included in the list of small giant growth companies that the mayor focused on fostering. In 2014, Hankang R&D Center was rated as "Tianjin Enterprise Key Laboratory".

Hankang is mainly engaged in the research of new chemical drugs, and the source of technology is independent research and development. The company has a professional scientific research team, and the technical personnel are all with a bachelor degree or above. At the same time, it employs a number of well-known experts at home and abroad as technical consultants, and the scientific research results are remarkable. At present, more than 180 products have been successfully developed, more than 40 new drug certificates, more than 90 new drug clinical approvals, and more than 40 production approvals. It has applied for more than 140 invention patents, obtained more than 60 invention patent certificates, and was rated as Tianjin Invention Patent Pilot Enterprise for two consecutive times.

In 2012, Hankang invested and built an industrialization base-Tianjin Hanrui Pharmaceutical Co., Ltd., covering an area of 20,000 square meters, with a total investment of 180 million yuan, and has built raw materials, tablets, granules, and capsules that meet the requirements of the new version of GMP. There are seven production lines for medicines, dry suspensions, freeze-dried powder injections, and small-volume injections. Among them, the freeze-drying production line is the first fully automatic production line in Tianjin. The product field involves cardiovascular and cerebrovascular, respiratory, digestive, mental disorders and endocrine systems.

Hankang adheres to the development idea of "innovative imitation and creative creation", adopts its own intellectual property technology for drug development, so as to replace imported products, and aims to reduce the cost of patients' medication and reduce the burden of national medical insurance. At the same time, it has carried out research on innovative drugs in the fields of anti-tumor, anti-thrombosis and endocrine, and related products have obtained invention patents.

Hankang is committed to building an internationally competitive new drug R&D, drug production and marketing team, with the goal of building an innovative drug R&D and production enterprise, and ultimately building an internationally renowned Hankang brand.

2. Hankang logo

It is a deformed combination of Hankang's two initials "HK".

The two blue "///" represent two highways: one is a high-tech highway and the other is an information highway. It also shows that the development of pharmaceutical companies is advancing with the times;

"Sinan"  means discovery, communication, and openness. At the same time, it also expresses sincerity, tenacity and innovation. Even in the most dangerous situations, the company will have its own eternal course;

"Green leaves"  represent the vibrant pharmaceutical industry and highlight the elements of the pharmaceutical industry.

The color of the LOGO is mainly blue and green, representing the future, health, and eternity.

Production

In 2012 , Tianjin Hanrui Pharmaceuticals designed and built standard modern factory buildings and advanced production lines in accordance with the management regulations of the 2010 edition of the "Good Manufacturing Practice for Pharmaceuticals" (GMP) . It has a full set of production lines for APIs, tablets, granules, capsules, dry suspensions , freeze-dried agents, aqueous injections and other dosage forms. Among them, the fully automatic feeding and discharging system in the freeze-dried preparation workshop is the first to introduce this system in Tianjin The company has minimized the man-made pollution in the production of sterile preparations; at the same time, it is equipped with domestic advanced testing equipment and complete testing methods.

In 2013 , Tianjin Hanrui Pharmaceutical was identified as a key enterprise for cultivating Tianjin Science and Technology Giants.

2014 Nian 10 months, Rui Han Tianjin Pharmaceutical obtain a 2010 version for Oral Suspension production line of GMP certificates.

2015 Nian 4 months, Tianjin Pharmaceutical obtain Han Rui 2010 version of tablet production line of GMP certificates.
