

OUR DNA

We connect – people,
mentalities and
markets in API's.

Every success has a beginning

1987

Philipp Titulski establishes the distributor Transo-Pharm.

1999

Transo-Pharm begins offering regulatory services on a global basis.

2002

Colleagues start taking shares in the company and Alexander Lipowitsch a holding in Transo-Pharm subsidiary company, Chemex Hamburg.

2010

Frank Krause as CFO and Justus Dehio as COO join the management board.

2018

Philipp Titulski leaves management board of the operative units.

Until today

About 50 dedicated and experienced colleagues of different specialist divisions focus their activities towards our customers and suppliers to achieve an efficient result of high quality. Transo-Pharm today is a global distributor with full regulatory support for API's.

Our understanding of quality

For us quality around active pharmaceutical components means to have the highest expectations and the highest possible goals technically and commercially. These expectations are what we aim for. Referring to our pharmaceutical products, the manufacturing process and documentation, as well as within our operations.

We find it is easier to reach our goals when we set high expectations for ourselves. And to always service our business partners and pharma clients as best as we can worldwide.
