

VERISTAT

EXPLORE VERISTAT

Veristat is a consultative CRO that is committed to building **TRUE Partnerships** with clients to progress therapies through the clinical development and approval process in order to improve and save people's lives.

Veristat views every clinical study first as an inspiring opportunity to assist with the development of an innovative product that can improve or save lives and second, as an opportunity to develop or continue long-term collaborative relationships based on mutual **T**rust, **R**espect, **U**nderstanding and **E**volution.

At Veristat, building **TRUE Partnerships** is what makes us successful.

Providing Unrivaled Regulatory Submission Knowledge

Integrated Veristat teams have assisted sponsors with over 60 regulatory submissions that have so far, led to more than 40 regulatory approvals.

Therapeutic Focus & Expertise

For nearly 25 years, Veristat has partnered with clients to bring drugs and biologics to market in nearly every therapy area. Many of our ongoing studies are for therapies to treat Cancers, Rare Diseases, Neurological Disorders, Cardiovascular Disease, and Infectious Diseases. In addition, our teams offer experience and expertise across a breadth of therapeutic indications including autoimmune disorders, endocrinology, pain disorders, respiratory, and more.

Case Study | We Value Creating Enduring TRUE Partnerships With Our Clients

A current client started working with Veristat over 6 years ago as a small venture funded company. Our initial engagement began with strategic consulting for their clinical development program, representation at numerous agency meetings (FDA & EMA), and evolved to running over 15 studies. We helped them as they grew from a 4 person to a 300 person firm and today we remain a preferred provider.

We Deliver On Our Promise Of TRUE Partnerships

*“By partnering with a **like-minded, scientifically focused** company such as Veristat, we have found a core team of **high caliber collaborators** who can help us to accelerate the development of our new class of targeted biologic therapies. Veristat is a preferred partner because of their **therapeutic and regulatory understanding** of both the fundamental elements of clinical research and the broader impact of our work.”*
