INTEGRATED SUPPORT

Our major strengths are our own teams of IPM, Analytical Development, Regulatory services, Quality Assurance, Sourcing & Project management. All integrated services ensure guaranteed on time completion of every Formulation Development project.

PROCESS DEVELOPMENT

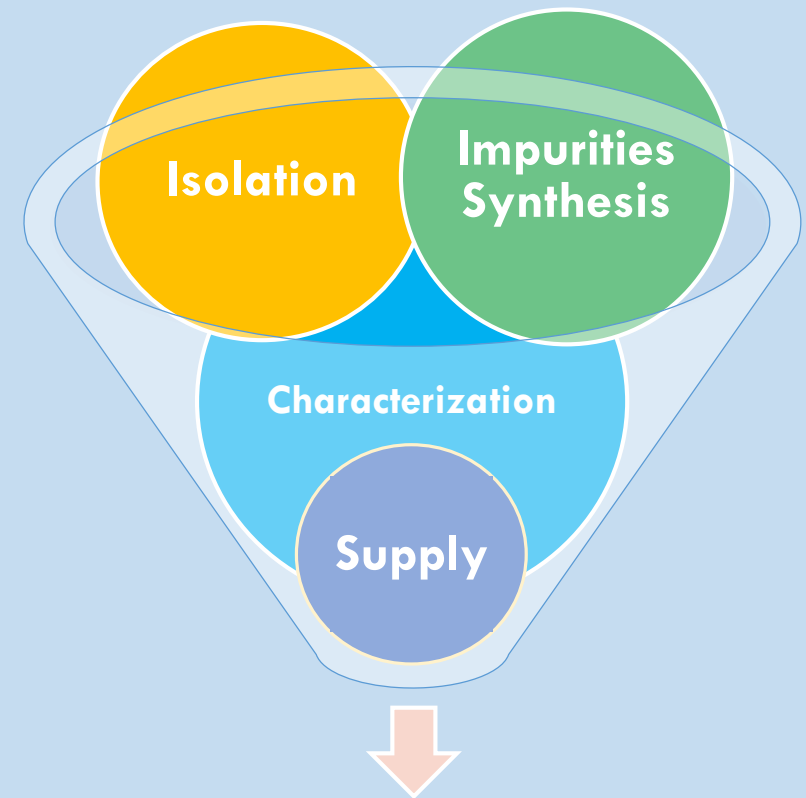

(SYNTHETIC RESEARCH)

We take up development of API's and intermediates to provide strategic advantage to our partners by facilitating-

- Early to entry
- Hard to source
- Cost effectiveness

The development can be exclusive, partially exclusive (region specific) or on non-exclusive basis.

As per client or regulatory requirement

PHARMA OUTSOURCING

As an outsourcing partner we facilitate high quality sourcing within the pharma industry and provide strategic advantage to various companies across the globe.

We provide outsourcing services for API, Intermediates supply and Contract manufacturing of Formulations as per the client specific requirements.

ENGINEERING SERVICES

API Research & Manufacturing facilities

- API
- High potent molecules (Oncology, hormones etc.)

Formulation Research & Manufacturing facilities

- Oral-Solid & Liquid
- Injectable
