

## **CETEARYL GLUCOSIDE**

Obtained by condensation of cetearyl alcohol with glucose.

**CAS No.** 246159-33-1

### **SYNONYM**

D-Glucopyranose,C16-18-alkyl glycosides; CetearylGlucoside;Cetearyl glucoside;Cetearyl polyglucose; D-Glucopyranose, C16-C18 alkyl glycosides; D-Glucoside, C16-C18 alkyl

### **SPECIFICATIONS**

Cetearyl glucoside is a Prod. obtained by condensation of cetearyl alcohol with glucose Cetearyl glucoside uses and applications include: Surfactant, ow emulsifier in cosmetics, dermopharmaceutical products

### **CLASS**

Specialty Chemicals

### **FUNCTIONS**

Surfactant, o/w Emulsifier

### **Properties**

Nonionic

### **INDUSTRY**

Cosmetic, Pharmaceutical
