

GREEN COFFEE EXTRACT

Green coffee is produced by extraction from coffee beans which are not roasted. Cultivation of coffee began in the AD's when roasting was not a common practice. The unroasted coffee beans were brewed to make coffee.

Actives

Chlorogenic acid 45%-50%

Indication for use

Weight loss agent, effective antioxidant, reduce the risk of diabetes

Origin

The coffee beans which are not roasted are the ones used for the manufacturing of green coffee extract.
